David P. Driscoll
Commissioner of Education

September 2003

Dear Friends:

I am pleased to issue our annual report, *Student Exclusions in Massachusetts Public Schools: 2000-01*. This report provides information regarding student exclusions, defined as the removal of a student from school for disciplinary reasons for more than ten consecutive school days, including permanent or indefinite removals. This information will be useful to the legislature, the Governor, and the Board of Education as they continue to address the issues of student discipline and school safety.

The Education Reform Act of 1993 and subsequent amendments authorize school principals, rather than school committees, to expel students who carry weapons or illegal drugs to school, assault school personnel, or are convicted of a felony while off school grounds.

Summary of Key Findings

In school year 2000-01, there were 1,621 student exclusions, an increase of 15 percent from the 1,412 exclusions in the prior year. In comparison to the total student enrollment, a disproportionate number of minority students were excluded from school. Approximately 45 percent of all exclusions involved either a student with an illegal substance or a weapon on school premises. Seventy-one percent of all students who were excluded from school were provided with alternative education.

The exclusion rate, instances of exclusion per 1000 students enrolled, varied among school districts. Of the 371 districts and charter schools in 2000-01, 127 districts, or 34 percent, excluded students from school.

We appreciate the efforts that school districts are making to ensure safe and orderly school environments and to provide serious learning opportunities for all students. If you have any questions or suggestions about the report, please contact:

Massachusetts Department of Education
Information Services and Technology

Sincerely,

David P. Driscoll
Commissioner of Education

STUDENT EXCLUSIONS: 2000-2001

Background

The 2000-01 school year was the eighth year in which the Department of Education required schools to submit student level data on student exclusions. The following analysis is based on data reported by schools on students excluded, as defined at the right, between July 1, 2000, and June 30, 2001.

A student exclusion is defined as the removal of a student from participation in regular school activities for disciplinary purposes for more than ten consecutive school days. The removal could also be permanent or indefinite.

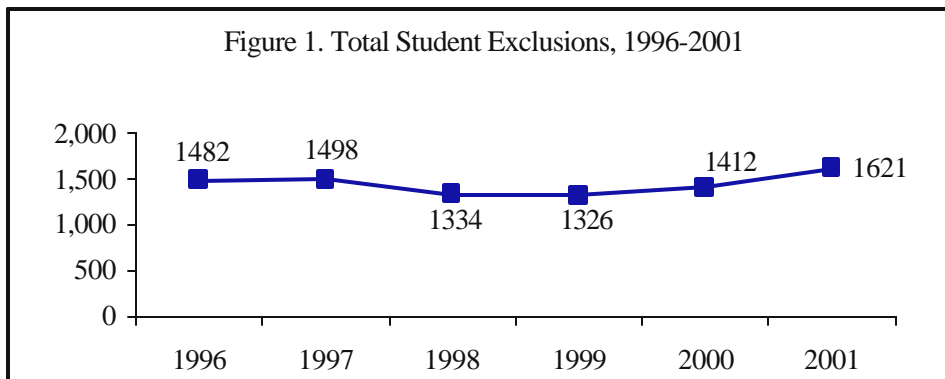

Results

There were 1,621 student exclusions in the 2000-01 school year from 127 school districts and charter schools. A total of 1,573 students were excluded, of whom 46 were excluded two or more times during the year. The greatest number of exclusions for an individual student was three.

Table 1. Student Exclusions Over Time

	1998-99	1999-00	2000-01
Number of Student Exclusions	1,326	1,412	1,621
Number of Individual Students Excluded	1,299	1,378	1,573
Number of Students Excluded More Than Once	26	31	46
Percent of Students Receiving Alternative Education	65%	70%	71%

As shown in Figure 1, the number of student exclusions during the 2000-01 school year increased by 15 percent from the previous year; the largest increase of student exclusions over the past six years. The number of students excluded more than once during the 2000-01 school year increased by 48 percent from the previous year and by 77 percent from 1998-99.

More than two-thirds of the students excluded from school were provided with alternative education, an increase of one percentage point from the prior year.

Exclusions by Student Characteristics

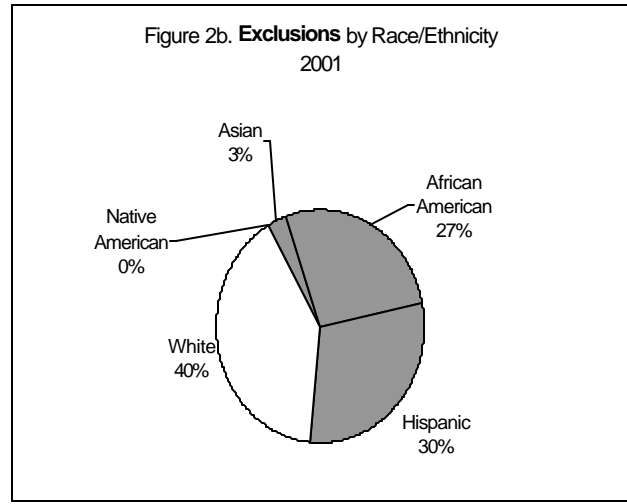

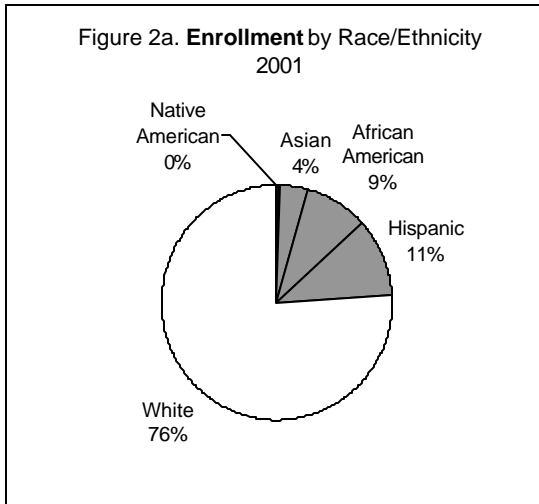

As shown in Table 2, approximately 77 percent of excluded students were male. The proportion of male exclusions in 2000-01 decreased slightly from the previous year. In comparison to the total student enrollment for 2000-01, a disproportionate number of students excluded from school continue to be students of color. This pattern has been consistent over time.

Table 2. Characteristics of Excluded Students

	1998-99		1999-00		2000-01	
	#	%	#	%	#	%
Gender

11-13 years old	325	25	308	22	375	23
14-16 years old	739	56	787	56	877	54
17-19 years old	241	18	282	20	301	19
20 years old and older	5	0	3	0	3	0
Program Status						
Regular Education	994	75	1,036	73	1,227	76
Special Education	332	25	376	27	394	24

Reported percentages may not total 100% due to rounding.

Figures 2a and 2b show that while students of racial and ethnic minority groups (African-American, Asian and Hispanic students) represented 24 percent of the total student enrollment, they accounted for 60 percent of student exclusions. White students comprised 76 percent of the total student enrollment and accounted for 40 percent of student exclusions.

In 2000-01, students who were excluded ranged in age from five to 20-years-old. Female students excluded ranged in age from six to 19-years-old and male students ranged in age from five to 20-years-old. Both male and female students (20 percent for males and 24 percent for females) were most frequently excluded from school at age 15-years-old.

The number of exclusions among students in all age categories increased from the previous year, except for those students age 20 years old and older, of which there were three. The largest percentage increase in the number of exclusions occurred for students 10 years of age or younger. Over the past three years, the number of students excluded in 2000-01 (65) more than doubled from the 1999-00 (32) school year and more than quadrupled from the 1998-99 school year (16).

Regular education students, who comprised 84 percent of the total student enrollment, accounted for 76 percent of student exclusions. Special education students, who comprised 16 percent of the total enrollment, accounted for 24 percent of student exclusions. The proportion of special education students among student exclusions decreased by three percentage points from the 1999-00 school year.

Exclusion Rates

Exclusion rates represent instances of exclusion per 1000 students enrolled. Although rates for both genders have increased over the past three years, female students' rates increased at a much higher rate (38 percent increase for female versus 12 percent increase for male) as shown in Table 3.

Exclusion rates have varied by racial/ethnic groups. The rate for African-American students was 5.1, Hispanic students, 4.6, Asian students, 1.2, Native American students, 1.1, and for white students, 0.9. Over the past three years, the exclusion rates for African-American and Asian students have increased, while others have fluctuated.

Table 3. Exclusion Rates by Gender and Race

	1998-99		1999-00		2000-01	
	#	Rate	#	Rate	#	Rate
Overall	1,326	1.4	1,412	1.5	1,621	1.7
Gender						
Male	1,097	2.2	1,145	2.3	1,249	2.5
Female	229	0.5	267	0.6	372	0.8
Race/Ethnicity						
African-American	257	3.1	340	4.1	438	5.1
Asian	37	0.9	51	1.2	55	1.3
Hispanic	429	4.5	468	4.7	481	4.6
Native American	1	0.5	3	1.2	3	1.1
White	602	0.8	550	0.7	644	0.9

Exclusion rates represent instances of exclusion per 1000 students enrolled (as of October 1).

As shown in Table 4, rates over the past three years increased for most grades. Trend data indicate that exclusion rates increase in grades leading up to ninth grade, peak at the ninth, and then decrease.

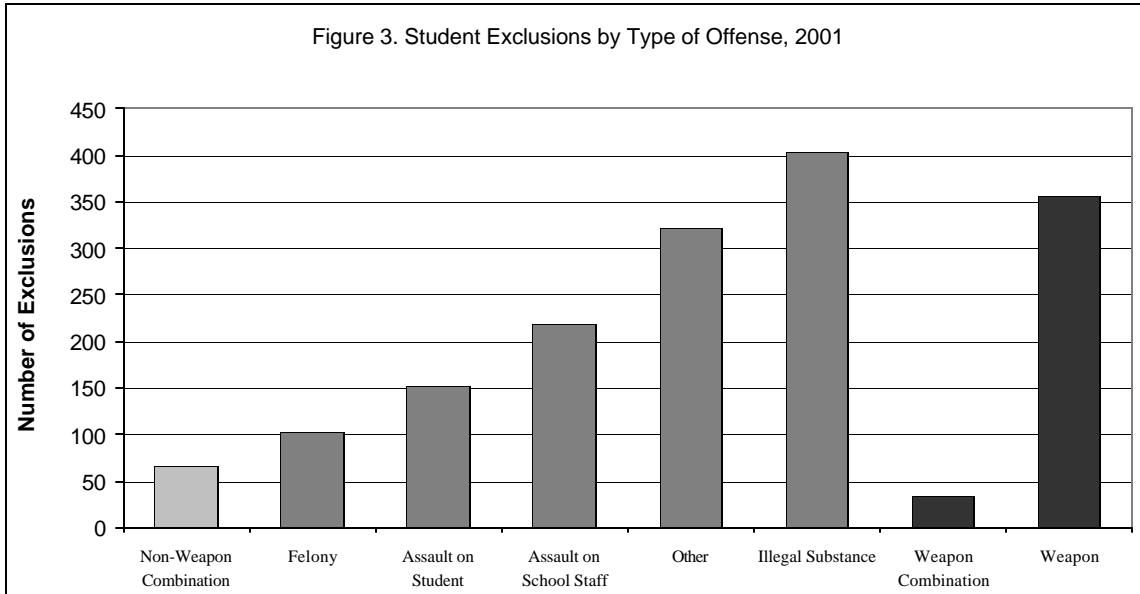

Table 4. Exclusion Rates by Grades

Grades	1998-99		1999-00		2000-01	
	#	Rate	#	Rate	#	Rate

12	81	1.5	108	1.9	131	2.3
Totals	1,326		1,412		1,621	

Exclusion rates represent instances of exclusion per 1000 students enrolled (as of October 1).

Exclusions by Type of Offense

Schools reported one or more offenses for each student exclusion. Figure 3 illustrates the number of exclusions that occurred for each of the offenses specified in state law as actions for which school principals are authorized to expel students, and for “other” offenses. Exclusions resulting from more than one offense are displayed as either a “weapon combination” or a “non-weapon combination”.

As shown in Table 5, trend data indicate that student exclusions by type of offense and type of weapon have not changed over the past three years. Most of the offenses reported were due to either possession of an illegal substance on school premises (25 percent) or a weapon (20 percent), followed by assaults on school staff (13 percent) and students (9 percent). For those offenses by type of weapon, an overwhelming majority involved knives (71 percent) and approximately 18 percent involved other types of weapons, such as razor blades or box cutters, scissors, clubs, toy guns and pepper spray.

Table 5. Exclusions by Type of Offense

	1998-99		1999-00		2000-01	
	#	%	#	%	#	%

Other	79	20	61	17	66	18
More than one weapon	8	2	8	2	6	2

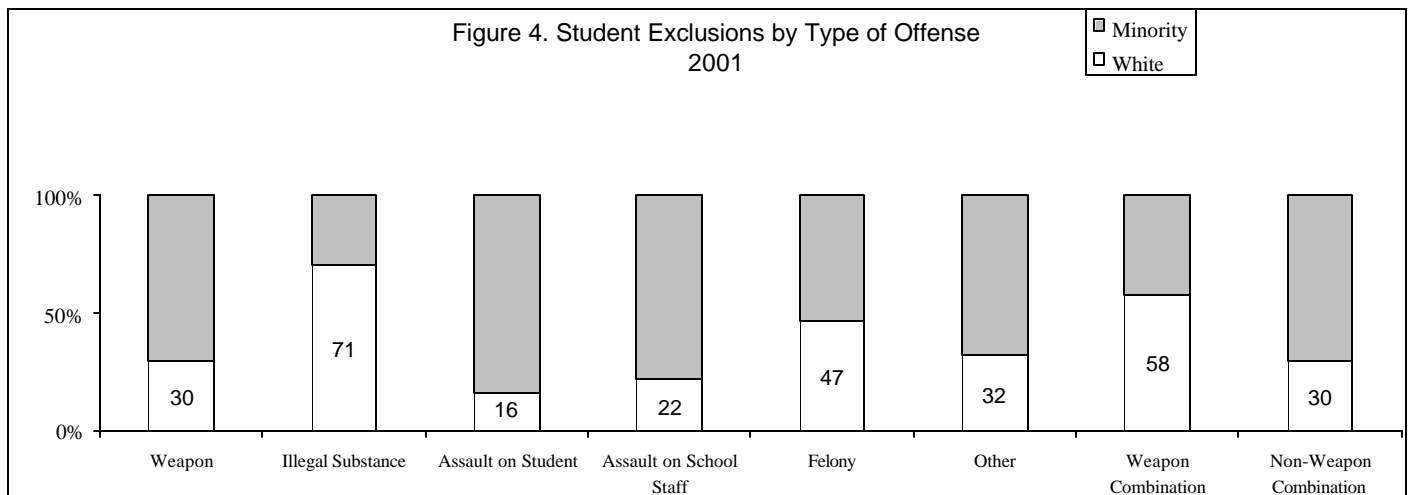

Reported percentages may not total 100% due to rounding.

*Data are for all exclusions involving weapons, including weapons violations in combination with other offenses (n=358).

Although the percentage of exclusions that involved guns was relatively small (six percent), according to the Gun-Free Schools Act, a student should be immediately expelled for a period of not less than one year, unless shortened by the superintendent on a case-by-case basis. In 2000-01, one student was excluded for a period of one year and five students were permanently excluded. Gun offenses have fluctuated over the past three years. In 1998-99 school year, 29 gun offenses were reported. By the following school year, 1999-00, 12 gun offenses were reported, less than half the number of gun offenses reported the previous year, but by the 2000-01 school year, gun offenses reported had increased close to the number reported in 1999 to 23.

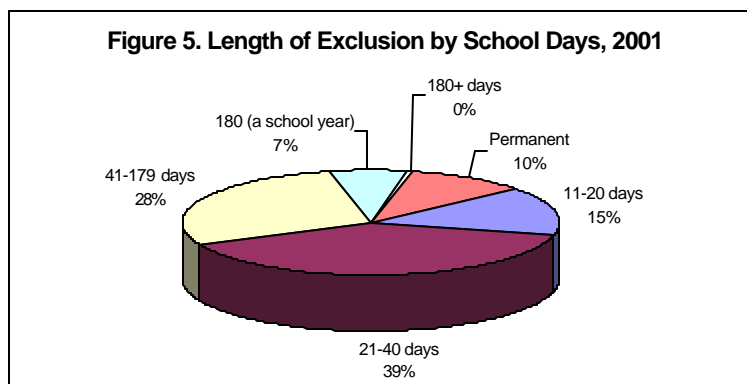

Exclusions by Type of Offense and by Race/Ethnicity

Figure 4 compares the distribution of exclusions for each type of offense for racial/ethnic minority students and for white students. Minority students accounted for 70 to 84 percent of exclusions for weapons violations, assaults on staff and assaults on students, while white students accounted for 71 percent of exclusions for possession of illegal substances.

Exclusions by Length of Time

Schools were asked to report the date the student was excluded and either the date the student returned to school or was eligible to return to school, if the exclusion was not permanent. In 1999, the Department began collecting data specifically on the number of *school days* a student missed due to exclusion from school. Previous reports included analyses of exclusions by calendar days.

Overall in the 2000-01 school year, there was an increase in shorter lengths of exclusions. More than 50 percent of the student exclusions were between 11 to 20 school days (15 percent), and between 21 to 40 school days (39 percent) as shown in Figure 5.

Student exclusions involving one school year (180 school days) had decreased from the previous two years; in 2000-01 there were 107 students reported, whereas in 1999-00 there were 159 and in 1998-99, 139 students reported. Permanent exclusions of students, commonly referred to as expulsions, had fluctuated over that same time period. In the 1998-99 school year, the number of students permanently excluded was 180, by 1999-00 school year 145 students were reported, and in 2000-01 school year, 168 students were reported permanently excluded (Table 6).

Table 6. Length of Exclusion by School Days

	1998-99		1999-00		2000-01	
	#	%	#	%	#	%
11-20 school days	159	12	189	13	247	15
21-40 school days	460	35	532	38	631	39
41-179 school days	381	29	387	27	461	28
180 days (one school year)	139	10	159	11	107	7
Longer than one school year	7	1	0	0	7	0
Permanent	180	14	145	10	168	10
Totals	1,326		1,412		1,621	

Reported percentages may not total 100% due to rounding.

Table 7 illustrates that the length of exclusion varied by race/ethnicity. For example, 25 percent of the Asian students who were excluded from school were removed permanently, compared to 16 percent of white students, five percent of Hispanic students and five percent of African-American students. No Native American students were excluded permanently.

Table 7. Length of Exclusion by Race/Ethnicity, 2001

	African American		American Indian		Asian		Hispanic		White	
	#	%	#	%	#	%	#	%	#	%

Alternative Education

As shown in Table 8, in 71 percent of all exclusions in the 2000-01 school year, students were provided with alternative education, an increase of one percentage point from the previous year. Sixty-four percent of regular education students excluded from school received alternative education, an increase of three percentage points from the prior year. Federal law requires special education students who are excluded from school to be offered alternative education. Ninety-four percent of the special education students excluded in 2000-01 received alternative education, a decrease of one percentage point from the previous year.

Of the 24 special education students who did not receive alternative education, 13 were reported as having refused or not responding to the offer of alternative education, two were reported as having been incarcerated, two had moved, and for seven students the school chose not to provide it.

Table 8. Alternative Education by Program Status

Alternative education not provided	0		0		0	
Not reported	0		0		0	

Reported percentages may not total 100% due to rounding.

Trend data show that students being provided alternative education have steadily increased over the past three years. From the 1998-99 school year to the 2000-01 school year, there was a 25 percent increase in students receiving alternative education. In addition, trend data show over the past three years that more than 80 percent of those students were being provided alternative education services via in-district alternative programs and through home tutoring programs (Table 8).

Of those student exclusion cases where alternative education was not made available, the primary reason over the past three years, schools choosing not to provide it, has remained constant. In addition, the number of exclusions in which students were reported refusing/not responding to offers of alternative education and moving/transferring, has also remained constant over the same time period. In contrast, the number of exclusions that involved the incarceration of students has decreased from 24 reported in the 1998-99 school year to 13 reported in the 2000-01 school year (Table 8).

Table 8. Alternative Education (continued)

Types of Alternative Education Provided	1998-99		1999-00		2000-01

Subtotal	467		425		465	
Totals	1,326		1,412		1,621	

Percentages may not total 100% due to rounding.

In the 2000-01 school year, when comparing the results of the distribution of exclusions by length and by race/ethnicity (Tables 6 and 7) to the distribution of exclusion by alternative education provided and by program status, the results are similar. As shown in Table 9, the majority of the students excluded receiving services were excluded between 21 to 40 school days.

Table 9. Alternative Education Provided by Program Status and by Length of Exclusion, 2001

	Regular Ed Students		Special Ed Students	
	#	%	#	%
11-20 school days	85	11	37	10
21-40 school days	332	42	199	54
41-179 school days	258	32	71	19

Longer than one school year	0	0	0	0
Permanent	50	6	30	8
Totals	787		370	

Percentages may not total 100% due to rounding.

Exclusions by District

As shown in Table 10, the percent of districts that excluded students has decreased over three years from 43 percent to 34 percent in 2001. Of those school districts that excluded students, the majority had fewer than 10 exclusions.

Table 10. Distribution of School Districts by Number of Exclusions

Number of Exclusions	1998-99		1999-00		2000-01	
	#	%	#	%	#	%
0	208	57	223	63	244	66

50-99	2	1	1	0	2	1
100 or more	3	1	4	1	3	1

Percentages may not total 100% due to rounding.

The number of districts having 10 or more student exclusions has fluctuated. In 1998-99, there were 23 districts reporting, 16 districts in 1999-00 and 24 districts in 2000-01. In 2000-01, more than two-thirds of the districts provided alternative education to more than 50 percent of their students. Most of these districts provided alternative education to the majority of their excluded students (Table 11).

				Norton	10	3	90

Rates of student exclusions per 1000 students enrolled (as of Oct. 1) are rounded to nearest whole numbers.

Although some districts may have excluded more than 10 students from school, they had fewer than four exclusions per 1000 students enrolled in the district due to their large enrollment. Other districts had fewer than 10 student exclusions, but had four or more exclusions per 1000 students. As illustrated in Table 12, there were 28 districts reporting four or more student exclusions per 1000 students in 2000-01 as compared to 17 districts in school year 1999-00.
