

The Massachusetts EWIS <i>is...</i>	The Massachusetts EWIS <i>is not...</i>
a method to better target interventions and student supports at the individual, small group, and whole school levels	a label for students (“not college-track”)
a systematic way to identify students for further review to determine if additional supports are necessary	a diagnostic tool with reasons why a student is at risk
related to measures that are included in the state’s accountability system	an accountability or college admissions measure
a system that DESE reexamines each year to continually improve	a stagnant system that will remain the same in future years
