The Massachusetts Department of Elementary and Secondary Education, Office for Career/ Vocational Technical Education, launched the Vocational Technical Education Framework Revision Project in April 2012. This Framework is the result of that effort and of the contributions of many educators across the state. The Department of Elementary and Secondary Education wishes to thank all of the Massachusetts groups that contributed to the development of these standards and all the individual teachers, administrators, and private sector advisory committee members who provided valuable employer validation of the standards for the Biotechnology Framework of the Manufacturing, Engineering & Technology Services Occupational Cluster.

Contributors to the 2012 Biotechnology Framework (VBIOT) Strands 2, 3 and 6:

Project Administrator:
Michelle Roche, Minuteman Regional Technical High School

Framework Team Leader:
Cherilee Lewis, Greater Lawrence Technical School

Technical Teachers:
Tina Silva (Greater Lawrence Technical School), Kimberly Stencil (Assabet Regional Technical High School), Patrick Rafter (Minuteman Regional Technical High School), Johanna vanderSpek (Worcester Technical High School)

Academic Teachers:
Tamara Lobo (Science, Greater Lawrence Technical School), Jaime Hennesey (English, Greater Lawrence Technical School), Betty Copeland (Mathematics, Worcester Technical High School)

Program Advisory Members:
David Wilson, Director of Engineering, Abbott Bioresearch Center; Raymond Dunn, Professor/ Chief—Dept. of Surgery, Division of Plastic Surgery, UMass Medical School; Lance Hartford, Exec. Director, Mass. Biotechnology Education Foundation; Tony Raymond, President, New Harbor SQA, LLC; Gary Ostroff, Professor of Molecular Medicine, UMass Medical School; Deborah Grant, Training Specialist, Abbott Bioresearch Center; Betty Copeland, Head of Math Dept., Worcester Technical High School; Jeff Dougan, Massachusetts Office on Disability; John Snoonian, Director, Chemical Process Research and Development, Sunovion Pharmaceuticals, Inc.; Bob Prytko, Associate Director, Process Engineering, Sunovion Pharmaceuticals, Inc.; Joseph Duffy, Associate Professor, Department Head, Department of Biology and Biotechnology, Worcester Polytechnic Institute; Robert Ross, Senior Director, Mass BioTeach Programs; Mariluci Bladon, Coordinator, Middlesex Community College Biotechnology Program; Stefanie Bourn, Research Associate, Genzyme; Naomi Custodia-Lora, Acting Assistant Dean, Northern Essex Community College; Norline Walker, Senior Validation Specialist, Pfizer; Wendy Mello, QA Manager, Boston Analytical; Karen Reisfelder, QA Stability Manager, Seaside Therapeutics; Heather Stoddard, Environmental Science and Technology Teacher, Southeastern Regional Vocational Technical High School.

Margaret Ellis, JP Keefe Technical High School

Team Members:
Lori Alie, Blackstone Valley Regional Vocational Technical High School
Lori Carr, Taunton High School
Barbara-jean Chauvin, Norfolk County Agricultural High School
Cheryl Hackenson, Tantasqua Regional High School
Clifford Keirstead, Whittier Regional Technical High School
Lynn McKiernan, Assabet Valley Regional Technical High School
John Oldham, Old Colony Regional Vocational Technical High School
Arlene Thompson, Worcester Technical High School

Resource Experts:
Jennifer Green, Network For Teaching Entrepreneurship Executive Director
Donna McFadden, MA DECA Director
Lisa Sandler, DESE –CVTE, Massachusetts Methods of Administration Coordinator
Commissioner’s Letter

July 2014

Dear Colleagues,

I am pleased to present to you the Massachusetts Vocational Technical Education Frameworks, adopted by the Department of Elementary and Secondary Education in June 2014. These frameworks, one for each of the 44 vocational technical programs, include standards in multiple strands representing all aspects of the industries that students in the vocational technical education program are preparing to enter.

The frameworks also include a crosswalk between the technical standards and relevant standards in Massachusetts Curriculum Frameworks to support effective integration of academic and technical content.

The comments and suggestions received during revision of the 2007 Massachusetts Vocational Technical Education Frameworks have strengthened these frameworks. We will continue to work with schools and districts to implement the 2014 Massachusetts Vocational Technical Education Frameworks over the next several years, and we encourage your comments.

I want to thank everyone who worked with us to create challenging learning standards for Massachusetts students. I am proud of the work that has been accomplished.

Sincerely,

Mitchell D. Chester, Ed.D.
Commissioner of Elementary and Secondary Education
Introduction

Overview & Organization and Key Changes

Overview

The Massachusetts Department of Elementary and Secondary Education understands the necessity of maintaining current Vocational Technical Education Frameworks which ensure career/vocational technical education students across the Commonwealth are taught the most rigorous standards aligned to the needs of business and industry.

With the advent of the Massachusetts Teaching & Learning System the Office for Career/Vocational Technical Education (CVTE) recognized the significance of including career/vocational technical education in the system and developed a comprehensive plan for including vocational technical education. The plan was designed in a Two Phase Process. Phase One included the revision of strands two, three, and six, of all of the Vocational Technical Education Frameworks. Phase Two consisted of three major components (projects) all equally crucial;

1. The revision of Strands One, Four, and Five to complete the revision of all six strands of the Vocational Technical Education Frameworks;

2. Statewide Professional Development on all revised strands, with training on strands two, three, and six delivered fall 2013, and training on strands one, four, and five delivered spring 2014;

3. The creation and development of additional Model Curriculum Unit (MCU) Teams.

The Office for Career/Vocational Technical Education Framework Team, with support from consultants, began Phase One in the 2012-2013 school year, to revise three of the six strands contained in all of the Vocational Technical Education (VTE) Frameworks. The state was organized into “Collaborative Partnerships” comprised of teams of project administrators, highly qualified subject matter educators, and business and industry partners, whose task was to revise Strand Two – Technical, Strand Three – Embedded Academics, and Strand Six – Technology Literacy. Each team met with a vocational advisory committee which included business and industry representatives and postsecondary education professionals, whose mission was to review and revise the team’s draft document during the revisionary process. Once strand two was revised, academic teachers (typically one English Language Arts teacher, one Mathematics teacher, and one Science teacher) worked with the technical subject matter teachers to develop a crosswalk between academic curricula standards and the technical standards, and provided examples of embedded academic content.

The Office for Career/Vocational Technical Education solicited statewide input from technical and academic teachers and administrators at the annual Massachusetts Association of Vocational Administrators (MAVA)/Massachusetts Vocational Association (MVA) - Connecting for Success Conference. Each framework team met with their content colleagues and reviewed the draft revisions and obtained
valuable feedback. Additionally, all drafts were reviewed and revised by the Massachusetts Vocational Technical Teacher Testing Program, to ensure appropriate measurable language.

Project consultants designed a new template to ensure all framework teams entered new standards and additional resources in a consistent manner. The framework teams created an “Appendix” listing potential industry recognized credentials attainable by secondary students; lists of professional, student, and relevant government organizations; and useful resources and websites. * It is important to note that although most Framework Teams provided information for the “Appendix”, not all teams did. Therefore, subheadings within the “Appendix” without information have been deleted. __Disclaimer: Reference in the Appendices Section to any specific commercial products, processes, or services, or the use of any trade, firm or corporation name is for the information and convenience of the public, and does not constitute endorsement or recommendation by the Massachusetts Department of Elementary and Secondary Education.

The Office for Career/Vocational Technical Education facilitated a comprehensive vetting process throughout the Commonwealth. During the fall of 2012 districts throughout Massachusetts solicited feedback from each Vocational Program’s Advisory Committee members at the Fall Board meetings. Additionally, the Office for Career/Vocational Technical Education met with various licensing boards at the Massachusetts Division of Professional Licensure and provided the applicable draft framework to each board for review. All framework drafts were posted on the CVTE website for public comment. Comments and suggested revisions received were shared with each framework team for response and edits, as appropriate.

The Phase I Process was completed on an accelerated timetable and resulted in all Vocational Technical Education Frameworks; Stand Two and Strand Six, revised with current, rigorous, relevant standards. Strand Three has been redesigned into a crosswalk which directly correlates academic and technical standards. An appendix of useful material for technical teachers recommended by their peers was added to each framework.

Phase II of the Framework Revision Process consisted of three major projects;

1. The Strands One, Four & Five Project, to complete the revision of all six strands of the Vocational Technical Education Frameworks;
2. Statewide Professional Development on all revised strands, with training on strands two, three, and six delivered fall 2013, and training on strands one, four, and five delivered spring 2014;
3. The creation and development of additional Model Curriculum Unit (MCU) Teams.

The Strands One, Four, & Five Project began in the fall of 2013 with the formation of a leadership team and three work groups. Co-Managers led the leadership team comprised of three Strand Coordinators who facilitated work teams and reviewed, researched, and revised these common strands. All skills specific to the vocational technical program have been included into Strand Two Technical.

The Strand One Team revised the safety knowledge and skills that all students need to acquire. The team included relevant issues (i.e., bullying, climate), laws, regulations, guidelines and policies pertaining to safety.
The Strand Four Team revised the Employability Knowledge and Skills that all students need to acquire. Teams considered current research on career readiness, including the work of the College Career Readiness Task Force convened by the Department, changes in workplace, technological changes that impact how people perform their work (i.e., communications methods), and included standards that emphasize the need for lifelong learning and adaptability given the multiple career changes over and an individual's working life. The team recommended this strand be renamed to: Career Readiness.

The Strand Five Team revised the Management & Entrepreneurship Knowledge and Skills that all students need to acquire. All business owners and employees must possess management and financial skills to be productive members of society. Skills included financial knowledge and basic business management skills.

All Strand One, Four and Five Project Teams worked collaboratively with staff from the Department of Elementary and Secondary Education and the Advisors of the Massachusetts Career and Technical Student Organizations to crosswalk standards to national Career & Technical Student Organizations Curricula, as applicable.

The Office for Career/Vocational Technical Education contracted the MAVA Consultant Team to work closely with the office to complete all of the work accomplished during Phase II of the Project.

A remarkable amount of work was accomplished through the efforts of hundreds of professionals who collaborated and diligently supported this work. The Office for Career/Vocational Technical Education is grateful for all the support received from the field, particularly all of the teachers (technical and academic), administrators, advisory committee members, business and industry representatives, the Division of Professional Licensure - boards, the Massachusetts Association of Vocational Administrators, the MAVA Consultants, and the Massachusetts Vocational Association, whose contributions were tremendous.

Special thanks to all staff in the Office for Career/Vocational Technical Education and the CVTE Framework Revision Team who provided guidance and numerous contributions during Phase One of the project.
Organization and Key Changes

This section contains the following:

- Highlights of Changes to the Vocational Technical Education Frameworks; which includes a summary of changes made to each strand.
- Organization of the Frameworks – Strand Two illustrates structure of topic headings, standards and objectives, and performance examples.

Highlights of Changes to the Vocational Technical Education Frameworks:

Strand One:

Safety and Health Knowledge and Skills have been revised to contain the safety standards that are common to all programs. The Strand One Team worked collaboratively with staff from the Department of Elementary and Secondary Education and the Advisors of the Career and Technical Student Organizations (CTSO) to crosswalk standards to national CTSO Curricula, as applicable.

- No objectives were deleted, only modified.
- Language and wording was clarified.
- Additions included a focus on maintaining a safe school and workplace in terms of creating a positive climate/environment.
- Student safety credential program has been revised.
- Safety attire has been revised.
- Emergency equipment and fire safety has been revised.
- Many new Performance Examples have been included.
- Within each strand, standards and objectives were grouped under Topic Headings, which are displayed in bold. Each standard is followed by a performance example. See the section below titled: “Organization of the Frameworks – Strand Two”. All strands were organized in that manner, with the exception of the former Strand Three.

Strand Two:

The Technical Standards Knowledge and Skills have been revised to reflect business and industry changes since the adoption of the 2007 Vocational Technical Education Frameworks (VTEF). There are additional changes to Strand Two below:

- The Technical Knowledge and Skills (Strand Two) section contains standards specific to the particular vocational program; suffix “a” (as common to all programs) and suffix “c” (as common within a cluster) have been removed.
- Each VTEF Strand Two begins with safety and health knowledge and skills specific to the particular vocational program.
- Within each strand, standards and objectives were grouped under Topic Headings, which are displayed in bold. Each standard is followed by a performance example. See the section below titled: “Organization of the Frameworks – Strand Two”. All strands were organized in that manner, with the exception of the former Strand Three.
• Strand Two of the Frameworks for Animal Science, Environmental Science and Technology, and Horticulture, begin with core standards required for all participants in the programs, followed by a series of standards organized in concentrations. See the section below titled: “Organization of the Frameworks – Strand Two” for more information.

• An update to some of the vocational programs framework is the addition of advanced or supplemental standards which are noted in Strand Two by an asterisk (*). These standards are not required, but are provided as suggestions that districts may choose to use to increase the depth of a particular topic, or add additional topics, particularly for advanced students or for those seniors who do not participate in cooperative education. See the section below titled: “Organization of the Frameworks – Strand Two” for more information.

Strand Three:

Since the purpose of Strand Three was to correlate academic content that was embedded in the knowledge and skills necessary to perform certain technical skills, it was logical to highlight those connections through a crosswalk between the academic curriculum standards and the technical standards (Strand Two). The crosswalk directly correlates the English Language Arts (2011) and Mathematics (2011) Frameworks, incorporating the Common Core Standards and the Science and Technology/Engineering Frameworks. The crosswalk can be found in the appendix of each vocational framework. The crosswalk also includes performance examples which illustrate integrated academic and technical content.

• Embedded Academics has been replaced with a crosswalk between the academic curriculum standards and the technical knowledge and skills standards. The crosswalk is located in the Appendices.

Strand Four:

Employability (and Career Readiness) Knowledge and Skills focused on providing students with general knowledge and skills to be college and career ready. The Strand Four Team worked collaboratively with staff from the Department of Elementary and Secondary Education and the Advisors of the Career and Technical Student Organizations to crosswalk standards to national CTSO Curricula, as applicable.

• Language and wording were clarified.
• Additions included a focus on providing students with skills for employability/career readiness.
• Modifications included Career Exploration & Navigation, Communication in the Workplace, and Work Ethic & Professionalism.
• New Performance Examples have been included.
• Within each strand, standards and objectives were grouped under Topic Headings, which are displayed in bold. Each standard is followed by a performance example. See the section below titled: “Organization of the Frameworks – Strand Two”. All strands were organized in that manner, with the exception of the former Strand Three.

Strand Five:
Strand Five contains Management and Entrepreneurship Knowledge and Skills that are general for all students. The Strand Five Team worked collaboratively with staff from the Department of Elementary and Secondary Education and the Advisors of the Massachusetts Career and Technical Student Organizations to crosswalk standards to national Career & Technical Student Organizations Curricula, as applicable.

- Language and wording were clarified and organized into a logical format.
- The Strand Five Team felt that the 2007 curriculum remained valid.
- Additions included a focus on providing students with skills for management and entrepreneurship applicable to all vocational programs.
- New Performance Examples have been included.
- Within each strand, standards and objectives were grouped under Topic Headings, which are displayed in bold. Each standard is followed by a performance example. See the section below titled: “Organization of the Frameworks – Strand Two”. All strands were organized in that manner, with the exception of the former Strand Three.

**Strand Six**

Strand Six Technology Literacy Knowledge and Skills has been replaced with the 2008 Massachusetts Technology Literacy Standards and Expectations Framework.
Appendix

Each framework contains an “Appendix” section which includes an Embedded Academic Crosswalk, Industry Recognized Credentials, Statewide Articulation Agreements, Professional, Governmental, and Student Organizations, Resources, and relevant websites.

The Appendix contains:

- Embedded Academic crosswalks for English Language Arts, Mathematics, and Science & Technology/Engineering.
- Statewide Articulations: Current statewide Articulation Agreements and/or Apprenticeship Programs available to the specific vocational program are listed on this page. The development of new statewide articulations continues, and therefore these pages will be revised as new agreements are finalized.
- Industry-Recognized Credentials: Technical Teacher Teams generated lists of credentials for the vocational programs. Program Advisory Committees throughout the state reviewed and provided recommendations through the validation process. The credential list has been provided as a resource only and districts are not obligated to provide all of the specified credentials for students.
- Other: These pages provide lists of reference materials, government agencies, professional and student organizations, and useful websites created by each framework team. These are intended as helpful resources for technical teachers, identified by peers. These are not recommended or required by the Department of Elementary & Secondary Education.

---

1 Note: Although most Framework Teams provided information for the “Appendix”, not all teams did. Therefore, sub-headings within the “Appendix” without information have been deleted.

Disclaimer: Reference in the Appendices Section to any specific commercial products, processes, or services, or the use of any trade, firm or corporation name is for the information and convenience of the public, and does not constitute endorsement or recommendation by the Massachusetts Department of Elementary and Secondary Education.
Organization of the Frameworks – Strand Two

The Vocational Technical Education Frameworks contain knowledge and skills covering all aspects of industry, reflected in six strands: Safety and Health, Technical, Embedded Academics, Employability, Management and Entrepreneurship, and Technological.

Within each strand, standards and objectives were grouped under topic headings, which are displayed in bold. Each standard is followed by a performance example. In the excerpt below, 2.A is the topic; 2.A.01 is the first standard and 2.A.01.01 and 2.A.01.02 are the objectives under that standard.

2.A Automotive Technology Specific Safety Practices

2.A.01 Identify and describe safety procedures when dealing with different types of automotive lifts according to current industry standards.
   2.A.01.01 Demonstrate procedures for safe lift operations.
   2.A.01.02 Demonstrate safe use, placement and storage of floor jacks and jack stands.

2.A.01 Performance Example:
- Student will set up lift using manufacturer’s suggested lift points.

2.A.02 Demonstrate and describe safety procedures when dealing with high pressure systems including necessary ventilation according to current industry standards.
   2.A.02.01 Describe and demonstrate the importance of safety procedures to be used when servicing high pressurized systems (fuel systems, brakes, air conditioning, suspension, hydraulic systems, etc.).
   2.A.02.02 Describe and demonstrate safe use of oxygen/acetylene torches and electric welding equipment.
   2.A.02.03 Demonstrate ventilation procedures to be followed when working in the lab/shop area.

2.A.02 Performance Example:
- Student will relieve fuel system pressure to perform necessary repairs.

2.A.03 Identify and describe safety procedures when dealing with electrical circuits according to current industry standards.
   2.A.03.01 Describe safety procedures to be followed when servicing supplemental restraint systems.
   2.A.03.02 Demonstrate safety awareness of high voltage circuits of electric or hybrid electric vehicles and related safety precautions.

2.A.03 Performance Example:
- Safely disable Supplemental Restraint System (SRS) air bag for repair using manufacturer’s recommendations.

There are additional changes to some of the Frameworks Strand Two (Technical Knowledge and Skills). Specifically, Strand Two of the Frameworks for Animal Science, Environmental Science and Technology and Horticulture begin with core standards required for all participants in the programs, followed by a series of standards organized in concentrations. For example, Strand Two of the Horticulture Framework begins with the core standards required of all Horticulture students.
Advanced / Supplemental Standards (Not Required)

Another variation that is new to the revised Strand Two Frameworks is the addition of advanced or supplemental standards which are noted with the use of an asterisk (*). These standards are not required, but are provided as suggestions that districts may choose to use to increase the depth of a particular topic, or add additional topics, particularly for advanced students or for those seniors who do not participate in cooperative education.

The following is an example from Automotive Technology, where entire topics were added:

**Advanced Automotive Technology Technical Knowledge and Skills**

*Note: The following competencies are optional, supplementary competencies suitable for advanced students. These are not required.*

2.CC **Demonstrate appropriate engine repair techniques.**

2.CC.01 Perform appropriate cylinder Head Repair.

2.CC.01.01* Diagnose, remove and replace cylinder head(s).

2.CC.01.02* Clean and visually inspect a cylinder head for cracks; check gasket surface areas for warpage and surface finish; check passage condition; determine necessary action.

The following is an example from the Strand Two Radio and Television Broadcasting Framework that shows the addition of an advanced objective, 2.B.04.08*:

2.B.04 Explain concepts fundamental to shooting in cinema and video.

2.B.04.01 Compare and contrast a single-camera and a multiple-camera production.

2.B.04.02 Explain the importance of shooting for the edit (i.e., match on action, sequencing, coverage).

2.B.04.03 Explain the importance of continuity.

2.B.04.04 Explain the 180° Rule line, and its application in various cinema scenarios.

2.B.04.05 Identify and establish a specific point-of-view when shooting from a script.

2.B.04.06 Analyze the methods in which specific shots can evoke emotion from an audience.

2.B.04.07 Define drop frame and non-drop frame code shooting and explain how to account for both when preparing for an edit.

2.B.04.08* Describe various cinematographic methods necessary when

---

2.B.04 Performance Examples:

- Students will list similarities and differences of single-camera and multiple-camera shoots.
- Students will describe multiple shooting considerations that are useful in streamlining the editing process.
shooting scenes that incorporate post-production visual effect

Manufacturing, Engineering & Technology Services Occupational Cluster

Biotechnology Framework (VBIOT)

Strand 1: Safety and Health Knowledge and Skills

1.A Fundamentals of Health and Safety

1.A.01 Describe and apply health and safety regulations.

1.A.01.01 Identify, describe and apply health and safety regulations that apply to specific tasks and jobs. Students must complete a safety credential program, e.g., Occupational Safety and Health Administration 10, CareerSafe and ServSafe.

1.A.01.02 Identify, describe and apply Environmental Protection Agency (EPA) and other environmental protection regulations that apply to specific tasks and jobs in the specific occupational area.

1.A.01.03 Identify, describe and apply Right-To-Know (Hazard Communication Policy) and other communicative regulations that apply to specific tasks and jobs in the specific occupational area.

1.A.01.04 Explain procedures for documenting and reporting hazards to appropriate authorities.

1.A.01.05 Identify and describe potential consequences for non-compliance with appropriate health and safety regulations.

1.A.01.06 Identify and list contact information for appropriate health and safety agencies and resources.

1.A.01 Performance Examples:

- List and define OSHA Health and Safety Regulations, EPA and other environmental protection regulations to occupational area.
- List and define Right-to-Know regulations and reporting of hazards and contact information for appropriate health and safety agencies.
- List the laws and rules of regulatory agencies governing sanitation and safety.
- Utilize OSHA as well as health and safety websites for purposes of research.

1.A.02 Demonstrate appropriate health and safety practices based on the specific occupational area.

1.A.02.01 Identify, describe and demonstrate the effective use of Safety Data Sheets (SDS).

1.A.02.02 Read and interpret chemical, product and equipment labels to determine appropriate health and safety considerations.

1.A.02.03 Identify, describe and demonstrate personal, shop and job site safety practices and procedures.

1.A.02.04 Demonstrate safe dress and use of relevant safety gear, personal protective equipment (PPE) and ergonomics, e.g., wrist rests, adjustable workspaces, equipment, gloves, proper footwear, earplugs, eye protection and breathing apparatus.
1.A.02.05 Demonstrate appropriate safe body mechanics, including appropriate lifting techniques and ergonomics.
1.A.02.06 Locate emergency equipment, first aid kit, SDS information directories and emergency action/response plan/escape routes in your lab, shop and classroom, including labels and signage that follow OSHA Hazard Communication Program (HAZCOM), eyewash stations, shower facilities, sinks, fire extinguishers, fire blankets, telephone, master power switches and emergency exits.
1.A.02.07 Demonstrate the safe use, storage, and maintenance of every piece of equipment in the lab, shop and classroom, e.g., the OSHA Lockout/Tagout Program (LOTO).
1.A.02.08 Describe safety practices and procedures to be followed when working with and around electricity, e.g., ground fault circuit interrupter (GFCI) and frayed wiring.
1.A.02.09 Handle, store, dispose of and recycle hazardous, flammable and combustible materials, according to EPA, OSHA and product specifications.
1.A.02.10 Demonstrate appropriate workspace cleaning, sanitation, disinfection and sterilization procedures required in specific occupational areas, e.g., Workplace Housekeeping OSHA Regulations.

1.A.02 Performance Examples:
- Identify, describe and demonstrate the use of SDS.
- List and demonstrate shop dress code, safety procedures and location of emergency equipment in labor classroom.
- Define and demonstrate safe storage and maintenance of equipment and proper disposal or recycling of hazardous, flammable and combustible materials.
- Identify, describe and demonstrate the Universal Precautions set of guidelines.

1.A.03 Demonstrate appropriate responses to situations that may threaten health and safety.
1.A.03.01 Describe First Aid procedures for potential injuries and other health concerns in the specific occupational area.
1.A.03.02 Describe the importance of emergency preparedness and an emergency action/response plan.
1.A.03.03 Describe procedures used to handle emergency situations, defensive measures and accidents, including identification, reporting, response, evacuation plans and follow-up procedures.
1.A.03.04 Identify, describe and demonstrate safety practices in specific occupational areas used to avoid accidents.
1.A.03.05 Identify and describe fire protection, protection, precautions and response procedures.
1.A.03.06 Discuss the role of the individual and the company/organization in ensuring workplace safety including transportation to and from school, school activities and the workplace.
1.A.03.07 Discuss ways to identify, prevent and report school and workplace violence, discrimination, harassment and bullying.
1.A.03.08 Demonstrate positive and appropriate behavior that contributes to a safe and healthy environment in school and the workplace.
1. A.03 Performance Example:
- Define first aid procedures and protocols used to handle emergency situations and practices used to avoid accidents.
- View safety videos and discuss the role of workplace safety.
- Attend or participate in a human rights alliance organization presentation.
- Observe and/or demonstrate the appropriate use of a fire extinguisher using the (PASS) technique: Pull, Aim, Squeeze, Sweep.
- Review and discuss specific policies, procedures and protocols regarding discrimination, harassment and bullying.
- Discuss and/or role-play proper and respectful behavior that contributes to a positive climate.
- Discuss and/or demonstrate behavior that contributes to a collaborative/teamwork environment.

## Strand 2: Technical Knowledge and Skills

### 2.A Safety in the Biotechnology Laboratory

#### 2.A.01 Complete and obtain a 10-hour OSHA certification

- **Performance Example:**
  - Complete 10hr OSHA certification course.

#### 2.A.02 Complete and obtain a CPR and First Aid Training card/credential.

- **Performance Example:**
  - Complete First Aid and CPR AED Training

#### 2.A.03 Follow safety and emergency procedures according to OSHA standards.

- **Performance Example:**
  - Students will use PPE at all times when working in the lab according to OSHA standards.
  - Students will wipe down work areas with 70% ethanol or a freshly prepared 1/10 dilution of bleach prior to and after working with bacteria.

### 2.B Basic Biotechnology Knowledge and Skills

#### 2.B.01 Demonstrate knowledge of biotechnology industry fundamentals.

- **Performance Example:**
  - Student will analyze a teacher provided case study which addresses the moral, ethical, and medical issues surrounding the treatment of a young child suffering from a rare genetic disorder.
  - Student teams will debate the bioethical concerns surrounding the use of genetic diagnosis, stem cells, and in-vitro fertilization.
2.B.02 Demonstrate knowledge of regulatory affairs.
2.B.02.01 Explain good documentation practices (e.g., signatures, dating, use of indelible ink, witnessing requirements).
2.B.02.02 Explain the history of pharmaceutical regulations and the Food and Drug Administration (FDA).
2.B.02.03 Explain the organization of the FDA (e.g., the roles of Center for Drug Evaluation and Research (CDER) and Center for Biologics Evaluation and Research (CBER)).
2.B.02.04 Explain the life cycle of medical products (e.g., discovery through clinical trials, New Drug Application (NDAs), Investigational New Drug (INDs)).
2.B.02.05 Explain current Good Manufacturing Practice (cGMP) and Good Laboratory Practice (GLP) regulations.
2.B.02.06 Explain the regulatory agencies at the local, state and federal levels.
2.B.02.07 Document assay procedures and results.
2.B.02.08 Evaluate results of assays (e.g., determine amount of analyte in quantitative assay).
2.B.02.09 Prepare results in written technical reports (e.g., designated report format is used, all resources are referenced, graphs and tables are clearly labeled and explained, data is accurately analyzed) and present orally.
2.B.02.10 Explain the roles of the IBC and IUCAC.
2.B.02.11 Explain the USDA and Public Health Service (PHS) Policy on the humane care and use of laboratory animals and the roles of the American Association for Laboratory Animal Science (AALAS) and Association for Assessment and Accreditation of Laboratory Animal Care (AAALAC).

2.B.02 Performance Example:
- Prepare a PowerPoint presentation to explain the history of the FDA.
- Document assay procedure and results in a laboratory notebook.

2.B.03 Demonstrate basic lab management skills.
2.B.03.01 Inventory supplies according to established procedures.
2.B.03.02 Obtain required materials.
2.B.03.03 Schedule work functions in an organized manner.
2.B.03.04 Clean and sterilize glassware and counters according to preestablished procedures.
2.B.03.05 Ensure that equipment is cleaned and maintained according to established preventative maintenance procedures.
2.B.03.06 Document lab support functions using logbooks, computer systems, forms, and other methods, according to established procedures (e.g., autoclave, pH meter, incubators and freezers).

2.B.03 Performance Example:
- An instructor designated student will act as a lab supervisor for the day.
  The student supervisor will assign lab maintenance duties (inventorying supplies, cleaning glassware, and equipment, media prep, etcetera), verify they are completed properly and review logbook entries that document all completed tasks for the day.
- Use a logbook to document use of equipment (i.e., autoclave).
2.C Biomanufacturing Fundamentals
2.C.01 Demonstrate and apply manufacturing process management techniques.
2.C.01.01 Identify, create and use standard operating procedures (SOPs).
2.C.01.02 Explain how process control data is used to monitor processes.
2.C.01.03 Test product to verify that it meets specifications and regulations.
2.C.01.04 Explain biomanufacturing lean techniques as they pertain to improved efficiency, reduction of waste and increased productivity.
2.C.01.05 Identify and apply the concepts of total quality management appropriate to the field.
2.C.01.06 Develop a comprehensive product development plan for a biotechnology product.

2.C.01 Performance Example:
- Create an SOP for the operation of a piece of lab equipment.
- Choose a biotechnology product and develop a CPDP.

2.D Solution Preparation
2.D.01 Perform basic calculations.
2.D.01.01 Perform calculations relating to measurements.
2.D.01.02 Perform calculations relating to reagent and media formulation and dilution.
2.D.01.03 Perform calculations relating to data acquisition and analysis.
2.D.01.04 Perform calculations relating to products, processing and quality control monitoring.
2.D.01.05 Perform calculations relating to growing cells and analyzing their growth rate.
2.D.01.06 Determine concentrations of solutions.
2.D.01.07 Graph and interpret data using electronic spreadsheet programs.
2.D.01.08 Perform calculations relating to dosage levels for animal studies (e.g., mg/kg, ml/kg).

2.D.01 Performance Example:
- Calculate the concentration of a copper sulfate solution.
- Create a standard curve graph using an Excel spreadsheet.

2.D.02 Prepare solutions.
2.D.02.01 Prepare percent, molar and molal solutions.
2.D.02.02 Perform dilutions and calculate resulting concentrations.
2.D.02.03 Perform serial dilutions.
2.D.02.04 Prepare agar plates and broths using appropriate techniques (filtration or autoclave).
2.D.02.05 Label and store reagents, solutions, and media according to established procedures.

2.D.02 Performance Example:
- Students will prepare 15mL of a 7.5% Copper sulfate solution.
- Students will perform four 1:10 serial dilutions of copper sulfate solutions.

2.E Instrumentation and Lab Assays
2.E.01 Metrology: Use measurement instrumentation.
2.E.01.01 Calibrate and maintain measuring instruments (e.g., balances, pH meters, thermometers, pipettes, spectrophotometers).
2.E.01.02 Make weight measurements with acceptable accuracy and precision.
2.E.01.03 Make volume measurements with acceptable accuracy and precision.
2.E.01.04 Make pH measurements with acceptable accuracy and precision.
2.E.01.05 Make temperature measurements with acceptable accuracy and precision.
2.E.01.06 Make spectrophotometric measurements with acceptable accuracy and precision.

### Performance Example:
- Students will demonstrate the ability to choose and use equipment for the measurement of weight, volume, pH, temperature, wavelength and concentration.
- Students will demonstrate the ability to calibrate and maintain equipment such as pH meters, balances, thermometers, pipettes and spectrophotometers.

### 2.E.02 Use microscopes.
- 2.E.02.01 Identify microscope parts.
- 2.E.02.02 Demonstrate use and care of microscopes.
- 2.E.02.03 Differentiate between the different types of microscopes and describe their uses (compound, inverted, scanning electron, fluorescent, and stereo).
- 2.E.02.04 Prepare a wet mount slide.
- 2.E.02.05 Prepare a slide with a cross section.
- 2.E.02.06 Demonstrate cleaning of the microscope and lenses.
- 2.E.02.07 Demonstrate basic cell staining techniques to observe cell morphology.
- 2.E.02.08 Count cells using a hemocytometer.
- 2.E.02.09 Identify and describe functions of cellular organelles.

### Performance Example:
- Students will demonstrate how to prepare a wet mount slide.
- Students will determine the number of cells using a hemocytometer when given a prepared slide.

### 2.E.03 Perform standard lab assays/techniques.
- 2.E.03.01 Isolate DNA.
- 2.E.03.02 Determine DNA concentration and purity.
- 2.E.03.03 Perform enzyme-linked immunoabsorbant assay (ELISA).
- 2.E.03.04 Perform western blotting.
- 2.E.03.05 Perform DNA fingerprinting.
- 2.E.03.06 Perform Polymerase Chain Reaction (PCR).
- 2.E.03.07 Perform gram staining.
- 2.E.03.08 Determine protein concentration.
- 2.E.03.09 Determine enzyme activity.

### Performance Example:
- Isolate plasmid DNA from transformed bacteria and determine DNA concentration and purity using a spectrophotometer set to absorbance 260 nm for concentration and a 260/280 nm ratio to determine purity.
- Separate Bovine Serum Albumin (BSA) from a mixture of proteins using SDS polyacrylamide gel electrophoresis (SDS PAGE).

### 2.E.04 Perform separation techniques.
- 2.E.04.01 Operate centrifuges.
- 2.E.04.02 Use filtration devices and systems.
- 2.E.04.03 Use electrophoresis systems (e.g., SDS PAGE and agarose gel electrophoresis).
- 2.E.04.04 Use chromatography (e.g., size exclusion, affinity, HIC, ion exchange).
2.E.04.05 Compare and contrast various chromatography methods. (including size exclusion, HPLC, reverse phase, affinity, HIC, ion exchange, etc.).

2.E.04 Performance Example:
• Assemble and pour size exclusion columns of various column bed depths.
• Compare and contrast various separation techniques.

2.F Cell techniques
2.F.01 Perform aseptic technique.
  2.F.01.01 Decontaminate work area prior to and after use.
  2.F.01.02 Dispose of waste following appropriate decontamination procedures.
  2.F.01.03 Maintain a sterile environment using a biological safety cabinet.
  2.F.01.04 Operate an autoclave and explain its use in sterile technique.
  2.F.01.05 Sterilize reagents, solutions, and media properly according to established procedures.

2.F.01 Performance Example:
• Students will decontaminate the biological safety cabinet prior to use.
• Students will autoclave prepared media.
• Students will filter sterilize heat–labile solutions.

2.F.02 Maintain microorganisms.
  2.F.02.01 Establish clonal cultures from a colony isolation.
  2.F.02.02 Culture bacteria using nutrient media on sterile agar plates and in fermentation flasks and test tubes.
  2.F.02.03 Identify bacteria using staining techniques, growth on selective media, and DNA analysis.

2.F.02 Performance Example:
• Isolate a single colony from a plate and streak for isolation on another plate.
• Prepare a slide from an isolated bacterial colony and perform a gram stain to determine if the bacteria are Gram negative or positive.

2.F.03 Transform cells.
  2.F.03.01 Transform bacteria with a plasmid.
  2.F.03.02 Explain transformation protocols for plant, mammalian and other cells.

2.F.03 Performance Example:
• Transform Eschericia coli JM109 with a plasmid containing a gene that codes for kanamycin resistance. Plate on LB agar plates containing kanamycin.
• Write a paper (or prepare a PowerPoint) that describes techniques for transformation of plant, bacterial and mammalian cells.

2.F.04 Maintain animal cells in tissue culture.
  2.F.04.01 Maintain suspension and/or attached cells.
  2.F.04.02 Preserve cells using cryopreservation.

2.F.04 Performance Example:
• Students will prepare media for growing animal cells.
• Students will grow and maintain cells (contamination free) in culture and passage those cells as necessary.
2.F.05  Clone plants.
2.F.05.01  Prepare and sterilize explants containing meristematic tissues.
2.F.05.02  Place explants in appropriate growth agar.
2.F.05.03  Monitor daily and record amount of time to callus, shoot, root and leaf formation; document stages of development photographically.
2.F.05.04  Transfer to new media, if appropriate.
2.F.05.05  Transfer the plantlet to solid potting mixture when it is large enough.

2.F.06  Use inverted microscopes to view cell cultures.
2.F.06.01  Performance Example:
  • Use an inverted microscope to view attached and suspension tissue culture cells.
  • Use an inverted microscope to count cells on a hemocytometer.

2.F.07  Determine the viability of cells in culture.
2.F.07.01  Performance Example:
  • Treat cells with trypan blue and count live and dead cells on a hemocytometer. If cells take up the trypan blue, they are non-viable. Determine the % of dead cells.
  • Treat attached cells on a plate with trypan blue and locate non-viable areas.

2.F.08  Describe the use of cells in biotechnology (e.g., use of cells in cancer research, as factories to produce enzymes and drugs, and for regenerative medicine therapies).
2.F.08.01  Performance Example:
  • Explain the differences between the use of bacteria and mammalian cells to produce recombinant proteins.
  • Explain the use of skin grafts in burn victims.
Strand 3: Embedded Academics

Strand 3: Embedded Academics, a critical piece of a Vocational Technical Education Framework, are presented as Crosswalks between the Massachusetts Vocational Technical Education Frameworks and the Massachusetts Curriculum Frameworks. These Crosswalks are located in the Appendix of this Framework.

Academic Crosswalks

Strand 4: Employability and Career Readiness

4.A.01  Develop a career plan and portfolio.
        4.A.01.01  Develop and revise career plan annually based on workplace awareness and skill attainment.
        4.A.01.02  Assess personal strengths and interest areas to determine potential careers, career pathways and career ladders.
        4.A.01.03  Examine potential career field(s)/discipline(s) and identify criteria to select, secure and keep employment in chosen field(s).
        4.A.01.04  Research and evaluate a variety of careers utilizing multiple sources of information and resources to determine potential career(s) and alternatives.
        4.A.01.05  Identify training and education requirements that lead to employment in chosen field(s) and demonstrate skills related to evaluating employment opportunities.
        4.A.01.06  Explore and evaluate postsecondary educational opportunities including degrees and certifications available, traditional and nontraditional postsecondary pathways, technical school and apprenticeships, cost of education, financing methods including scholarships and loans and the cost of loan repayment.
        4.A.01.07  Create a portfolio showcasing academic and career growth including a career plan, safety credential, resume and a competency profile demonstrating the acquisition of the knowledge and skills associated with at least two years of full-time study in the Chapter 74 program.

4.A.02  Demonstrate job search skills.
        4.A.02.01  Conduct a job search and complete written and electronic job applications, resumes, cover letters and related correspondence for a chosen career path.
        4.A.02.02  Explore and evaluate postsecondary job opportunities and career pathways specific to career technical areas.
        4.A.02.03  Identify role and use of social media and networking for staying current with career and employment trends as well as networking, job seeking and career development opportunities.
        4.A.02.04  Demonstrate ability to use social media and networking to develop useful occupational contacts, job seeking and career development opportunities.

4.A.03  Demonstrate all phases of the job interview process.
        4.A.03.01  Gather relevant information about potential employer(s) from multiple print and digital sources, assessing the credibility and accuracy of each source.
        4.A.03.02  Identify employment eligibility criteria, such as drug/alcohol free status, clean driving record, etc.
4.A.03.03 Practice effective interviewing skills: appearance, inquiry and dialogue with interviewer, positive attitude and evidence of work ethic and skills.

4.A.03.04 Explore and evaluate employment benefit packages including wages, vacation, health care, union dues, cafeteria plans, tuition reimbursement, retirement and 401K.

4.A. Performance Examples:
- Conduct research to analyze and present on specific careers within a cluster.
- Conduct web-based job search using sites such as Monster.com, CareerBuilder.com, Indeed.com, Snagajob.com, Simplyhired.com and others.
- Create profile on social media/networking site such as LinkedIn and/or LinkedIn University for postsecondary research and employment opportunities.
- Complete online job application.
- Conduct and videotape practice interviews for instructor and student analysis.
- Provide students with sample employment and benefit packages for evaluation.

4.B Communication in the Workplace
4.B.01 Demonstrate appropriate oral and written communication skills in the workplace.

4.B.01.01 Communicate effectively using the language and vocabulary appropriate to a variety of audiences within the workplace including coworkers, supervisors and customers.

4.B.01.02 Read technical and work-related documents and demonstrate understanding in oral discussion and written exercise.

4.B.01.03 Demonstrate professional writing skills in work-related materials and communications (e.g., letters, memoranda, instructions and directions, reports, summaries, notes and/or outlines).

4.B.01.04 Use a variety of writing/publishing/presentation applications to create and present information in the workplace.

4.B.01.05 Identify, locate, evaluate and use print and electronic resources to resolve issues or problems in the workplace.

4.B.01.06 Use a variety of financial and data analysis tools to analyze and interpret information in the workplace.

4.B.01.07 Orally present technical and work-related information to a variety of audiences.

4.B.01.08 Identify and demonstrate professional non-verbal communication.

4.B.02 Demonstrate active listening skills.

4.B.02.01 Listen attentively and respectfully to others.

4.B.02.02 Focus attentively, make eye contact or other affirming gestures, confirm understanding and follow directions.

4.B.02.03 Show initiative in improving communication skills by asking follow-up questions of speaker in order to confirm understanding.
4.C  **Work Ethic and Professionalism**

4.C.01 Demonstrate attendance and punctuality.
4.C.01.01 Identify and practice professional time-management and attendance behaviors including punctuality, reliability, planning and flexibility.

4.C.02 Demonstrate proper workplace appearance.
4.C.02.01 Identify and practice professional appearance specific to the workplace.
4.C.02.02 Identify and practice personal hygiene appropriate for duties specific to the workplace.
4.C.02.03 Identify and wear required safety gear specific to the workplace.

4.C.03 Accepts direction and constructive criticism.
4.C.03.01 Demonstrate ability (both verbally and non-verbally) to accept direction and constructive criticism and to implement solutions to change behaviors.
4.C.03.02 Ask appropriate questions to clarify understanding of feedback.
4.C.03.03 Analyze own learning style and seek instructions in a preferred format that works best for their understanding (such as oral, written or visual instruction).

4.C.04 Demonstrate motivation and initiative.
4.C.04.01 Evaluate assigned tasks for time to completion and prioritization.
4.C.04.02 Demonstrate motivation through enthusiasm, engagement, accurate completion of tasks and activities.
4.C.04.03 Demonstrate initiative by requesting new assignments and challenges.
4.C.04.04 Explain proposed solutions to challenges observed in the workplace.
4.C.04.05 Demonstrate the ability to evaluate multiple solutions to problems and challenges using critical reasoning and workplace/industry knowledge and select the best solution to the problem.
4.C.04.06 Implement solution(s) to challenges and/or problem(s) observed in the workplace.
4.C.04.07 See projects through completion and check work for quality and accuracy.

4.C.05 Demonstrate awareness of workplace culture and policy.
4.C.05.01 Display ethical behavior in use of time, resources, computers and information.
4.C.05.02 Identify the mission of the organization and/or department.
4.C.05.03 Explain the benefits of a diverse workplace.
4.C.05.04 Demonstrate a respect for diversity and its benefit to the workplace.

4.C.06 Interact appropriately with coworkers.
4.C.06.01 Work productively with individuals and in teams.
4.C.06.02 Develop positive mentoring and collaborative relationships within work environment.
4.C.06.03 Show respect and collegiality, both formally and informally.
4.C.06.04 Explain and follow workplace policy on the use of cell phones and other forms of social media.
4.C.06.05 Maintain focus on tasks and avoid negative topics or excessive personal conversations in the workplace.
4.C.06.06 Negotiate solutions to interpersonal and workplace conflicts.

4.C Performance Examples:
- Complete a learning style analysis tool.
- Develop a rubric to assess work ethic and professionalism as detailed in the standards above.

Strand 5: Management and Entrepreneurship Knowledge and Skills

5.A Starting a Business
5.A.01 Demonstrate an understanding of the practices required to start a business.
   5.A.01.01 Define entrepreneurship and be able to recognize and describe the characteristics of an entrepreneur.
   5.A.01.02 Compare and contrast types of business ownership (i.e., sole proprietorships, franchises, partnerships, corporations).
   5.A.01.03 Identify and explain the purpose and contents of a business plan.
   5.A.01.04 Demonstrate an understanding of the principles and concepts of a business’s supply chain (i.e., suppliers, producers and consumers).

5.A Performance Examples:
- Develop a presentation pertaining to an entrepreneur and their business.
- Communicate with a business owner and discuss the pros and cons of starting and owning a business. Summarize the main points of the discussion.
- Choose a product or service and describe the process leading to distribution.
- Write a business plan for a business in your community.

5.B Managing a Business
5.B.01 Demonstrate an understanding of managing a business.
   5.B.01.01 Formulate short- and long-term business goals.
   5.B.01.02 Demonstrate effective verbal, written and visual communication skills.
   5.B.01.03 Utilize a decision-making process to make effective business decisions.
   5.B.01.04 Identify a business’s chain of command and define its organizational structure.
   5.B.01.05 Identify and apply effective customer service skills and practices.
   5.B.01.06 Identify, interpret and develop written operating procedures and policies.
   5.B.01.07 Track inventory, productivity and labor cost.
   5.B.01.08 Demonstrate business meeting skills.
   5.B.01.09 Identify professional organizations and explore their benefits.

5.B Performance Examples:
- Working as a team, role-play situations that an entrepreneur might face in dealing with customers or employees.
- Contact a relevant professional organization and request information about its benefits, membership requirements and costs.
- Plan and conduct a business meeting.
- Identify companies that are known for customer service and list the practices that help differentiate themselves from all others in their industry.

5.C Marketing a Business
5.C.01 Demonstrate an understanding of marketing and promoting a business.
   5.C.01.01 Explain the role of business in the economy.
   5.C.01.02 Describe the relationship between business and community.
   5.C.01.03 Describe methods of market research and identifying target markets.
5.C.01.04 Describe and apply the concepts of a marketing mix (the 4Ps of marketing: product, price, place and promotion).
5.C.01.05 Compare and contrast the promotional tools and techniques used to sell products, services, images and ideas.
5.C.01.06 Describe the impact of supply and demand on a product or business.
5.C.01.07 Identify direct and indirect competition on a business.
5.C.01.08 Identify and use sales techniques to meet client needs and wants.
5.C.01.09 Discuss strategies to acquire and retain a customer base.

5.C Performance Examples:
- Research reliable sources to identify marketing and industry data related to a business.
- Conduct market research by developing a survey and presenting the results.
- Create a promotional campaign using a variety of media.
- Write a marketing plan for a product.

5.D Financial Concepts and Applications in Business
5.D.01 Demonstrate an understanding of financial concepts and applications.
5.D.01.01 Identify essential financial reports and understand their purpose (i.e., budget, balance sheet and income statement).
5.D.01.02 Describe payroll practices (i.e., deductions – federal, FICA and state taxes and insurances).
5.D.01.03 Identify the importance of maintaining accurate records.
5.D.01.04 Apply practices related to pricing, purchasing and billing.
5.D.01.05 Maintain and reconcile a checking account.
5.D.01.06 Identify the options for funding a business.

5.D Performance Examples:
- Given an employee time card and rate of pay, calculate gross pay, taxes, deductions and net pay.
- Develop a budget for a simulated business or project.
- Analyze and discuss financial documents from a company.
- Research various methods of funding a business.

5.E Legal/Ethical/Social Responsibilities
5.E.01 Demonstrate an understanding of legal, ethical and social responsibility for businesses.
5.E.01.01 Identify state and federal laws and regulations related to managing a business.
5.E.01.02 Describe and identify ethical business practices.
5.E.01.03 Demonstrate an understanding of business contracts.
5.E.01.04 Explain the role of diversity in the workplace.
5.E.01.05 Explain the role of labor organizations.
5.E.01.06 Identify practices that support clean energy technologies and encourage environmental sustainability.
5.E.01.07 Demonstrate an understanding of how technology advancements impact business practices.

Glossary

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Balance sheet</td>
<td>A statement of the assets, liabilities and capital of a business at a particular point in time.</td>
</tr>
<tr>
<td>Budget</td>
<td>An estimate of income and expenditure for a set period of time.</td>
</tr>
<tr>
<td>Business Ownership</td>
<td>Types of business ownership refer to the legal structure of an organization. Legal structures include: Sole Proprietorship, Partnerships, Corporations and Limited Liability Companies.</td>
</tr>
<tr>
<td>Business Plan</td>
<td>A written document that describes in detail your business goals and how you are going to achieve them from a marketing, operational and financial point of view.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-------------------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Chain of Command and Organizational Structure</td>
<td>Refers to the management structure of an organization. It identifies lines of authority, lines of communication, and reporting relationships. Organizational structure determines how the roles, power and responsibilities are assigned and coordinated and how information flows between the different levels of management. (A visual representation of this structure is called an org chart).</td>
</tr>
<tr>
<td>Income Statement</td>
<td>A financial statement providing operating results for a specific time period showing a business’s revenues, expenses and profit or loss.</td>
</tr>
</tbody>
</table>
| Market Research                           | • Primary: Surveys, Focus Groups, Observation  
• Secondary: Websites, Internet                                                            |
| Marketing Mix                             | A set of controlled variables that formulate the strategic position of a product or service in the marketplace. These variables are known as the 4 P’s of marketing and include product, place, price and promotion. |
| Methods to Track Inventory, Productivity and Labor Cost | Refers to the processes a business uses to account for: 1) the inflows and outflows of inventory and materials related to inventory; 2) the efficiency of operations and 3) the cost of labor including salary and benefits. |
| Promotional Tools and Techniques          | The six elements of a promotional mix are: advertising, visual merchandising, public relations, publicity, personal selling and sales promotion. |
| Supply Chain                              | The supply chain, or channel of distribution, describes how the product is handled and/or distributed from suppliers with materials, to the manufacturer, wholesaler or retailer and finally to the consumer. |
| Target Market                             | Those who are most likely to buy your product or service.                                                                                   |
Strand 6: Technology Literacy Knowledge and Skills

6.A  Technology Literacy Knowledge and Skills (Grades 9 through 12)
6.A.01  Demonstrate proficiency in the use of computers and applications, as well as an understanding of the concepts underlying hardware, software, and connectivity.
  6.A.01.01  Use online help and other support to learn about features of hardware and software, as well as to assess and resolve problems.
  6.A.01.02  Install and uninstall software; compress and expand files (if the district allows it).
  6.A.01.03  Explain effective backup and recovery strategies.
  6.A.01.04  Apply advanced formatting and page layout features when appropriate (e.g., columns, templates, and styles) to improve the appearance of documents and materials.
  6.A.01.05  Use editing features appropriately (e.g., track changes, insert comments).
  6.A.01.06  Identify the use of word processing and desktop publishing skills in various careers.
  6.A.01.07  Identify the use of database skills in various careers.
  6.A.01.08  Define and use functions of a spreadsheet application (e.g., sort, filter, find).
  6.A.01.09  Explain how various formatting options are used to convey information in charts or graphs.
  6.A.01.10  Identify the use of spreadsheet skills in various careers.
  6.A.01.11  Use search engines and online directories.
  6.A.01.12  Explain the differences among various search engines and how they rank results.
  6.A.01.13  Explain and demonstrate effective search strategies for locating and retrieving electronic information (e.g., using syntax and Boolean logic operators).
  6.A.01.14  Describe good practices for password protection and authentication.
6.A.02  Demonstrate the responsible use of technology and an understanding of ethics and safety issues in using electronic media at home, in school, and in society.
  6.A.02.01  Demonstrate compliance with the school’s Acceptable Use Policy.
  6.A.02.02  Explain issues related to the responsible use of technology (e.g., privacy, security).
  6.A.02.03  Explain laws restricting the use of copyrighted materials.
  6.A.02.04  Identify examples of plagiarism, and discuss the possible consequences of plagiarizing the work of others.
6.A.03  Design and implement a personal learning plan that includes the use of technology to support lifelong learning goals.
  6.A.03.01  Evaluate the authenticity, accuracy, appropriateness, and bias of electronic resources, including Web sites.
  6.A.03.02  Analyze the values and points of view that are presented in media messages.
  6.A.03.03  Describe devices, applications, and operating system features that offer accessibility for people with disabilities.
6.A.03.04 Evaluate school and work environments in terms of ergonomic practices.
6.A.03.05 Describe and use safe and appropriate practices when participating in online communities (e.g., discussion groups, blogs, social networking sites).
6.A.03.06 Explain and use practices to protect one's personal safety online (e.g., not sharing personal information with strangers, being alert for online predators, reporting suspicious activities).
6.A.03.07 Explain ways individuals can protect their technology systems and information from unethical users.

6.A.04 Demonstrate the ability to use technology for research, critical thinking, problem solving, decision making, communication, collaboration, creativity, and innovation.
6.A.04.01 Devise and demonstrate strategies for efficiently collecting and organizing information from electronic sources.
6.A.04.02 Compare, evaluate, and select appropriate electronic resources to locate specific information.
6.A.04.03 Select the most appropriate search engines and directories for specific research tasks.
6.A.04.04 Use a variety of media to present information for specific purposes (e.g., reports, research papers, presentations, newsletters, Web sites, podcasts, blogs), citing sources.
6.A.04.05 Demonstrate how the use of various techniques and effects (e.g., editing, music, color, rhetorical devices) can be used to convey meaning in media.
6.A.04.06 Use online communication tools to collaborate with peers, community members, and field experts as appropriate (e.g., bulletin boards, discussion forums, listservs, Web conferencing).
6.A.04.07 Plan and implement a collaborative project with students in other classrooms and schools using telecommunications tools (e.g., e-mail, discussion forums, groupware, interactive Web sites, video conferencing).
Appendices

The framework teams created an “Appendix” listing potential industry recognized credentials attainable by secondary students; lists of professional, student, and relevant government organizations; and useful resources and websites. *It is important to note that although most Framework Teams provided information for the “Appendix”, not all teams did. Therefore, sub-headings within the “Appendix” without information have been deleted.*

Disclaimer: Reference in the Appendices Section to any specific commercial products, processes, or services, or the use of any trade, firm or corporation name is for the information and convenience of the public, and does not constitute endorsement or recommendation by the Massachusetts Department of Elementary and Secondary Education.

<tr>
<td>7.RP.3</td>
<td>7.RP.3 Use proportional relationships to solve multistep ratio and percent problems. Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error</td>
<td></td>
</tr>
<tr>
<td>8.SP.3, 5.G.2, 6.NS.8, 7.RP.2.a</td>
<td>8.SP.3 Use the equation of a linear model to solve problems in the context of bivariate measurement data, interpreting the slope and intercept. For example, in a linear model for a biology experiment, interpret a slope of 1.5 cm/hr as meaning that an additional hour of sunlight each day is associated with an additional 1.5 cm in mature plant height. 5.G.2 Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation.</td>
<td></td>
</tr>
</tbody>
</table>

### Embedded Mathematics
| Performance Example: |  
| Set up a BSA standard curve and read at proper absorbance. Determine the linear relationship for $y = mx + b$ (Excel). Use the equation to solve for the unknown sample. Make sure the unknown sample falls in the linear range of the standard curve. If not, correct for amount of sample assayed. Set up serial dilutions of horseradish peroxidase and assay for activity using a TMB substrate. |  
| Performance Example: |  
| Students will be able to understand the relationship between pore size and molecule size. Example, a bacteria will not pass through 0.2 micrometer filter. Mycoplasma can vary in size from 0.15 to 0.3 micrometers and could pass through a 0.2 micrometer filter, as will viruses. |  
| Performance Example: |  
| Dilute 1 M sodium chloride 1/1,000,000 and report as a 1/10^6 dilution and as a final concentration of 1.0 uM |
7.RP.3 Use proportional relationships to solve multistep ratio and percent problems. Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error.

8.EE.4 Perform operations with numbers expressed in scientific notation, including problems where both decimal and scientific notation are used. Use scientific notation and choose units of appropriate size for measurements of very large or very small quantities (e.g., use millimeters per year for seafloor spreading). Interpret scientific notation that has been generated by technology.

<table>
<thead>
<tr>
<th>Performance Example:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Dilute 10 mg/ml BSA, using a 1/10 set of serial dilutions down to a final concentration of 0.0001 mg/ml. Report using scientific notation as $10^{-4}$ mg/ml</td>
<td></td>
</tr>
<tr>
<td>2.E.01.02</td>

</tr>
<tr>
<td></td>
<td>S-ID.7 Interpret the slope (rate of change) and the intercept (constant term) of a linear model in the context of the data.</td>
</tr>
</tbody>
</table>
4.MD.1 Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two column table. For example, know that 1 ft is 12 times as long as 1 in. Express the length of a 4 ft snake as 48 in. Generate a conversion table for feet and inches listing the number pairs (1, 12), (2, 24), (3, 36), ...

Performance Example:
Perform a bacterial growth curve and report the equation for the linear relationship of log phase growth. Determine rate of change.

2.D.01.04 4.MD.1

Performance Example:
Express product concentration in ug/ul, mg/ml, kg/l and choose the appropriate units for your product.

2.D.01.05 8.EE.4

Performance Example:
Report seeding of animal cells and absolute numbers of cells at various times using scientific notation.

2.D.01.06 4.MD.1

Performance Example:
Perform a protein assay and report concentration using appropriate units.

2.D.02.01 6.RP.3.c, 7.RP.3, 4.MD.1

6.RP.3.c Find a percent of a quantity as a rate per 100 (e.g., 30% of a quantity means 30/100 times the quantity); solve problems involving finding the whole, given a part and the percent.

7.RP.3 Use proportional relationships to solve multistep ratio and percent problems. Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error

4.MD.1 Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two column table. For example, know that 1 ft is 12 times as long as 1 in. Express the length of a 4 ft snake as 48 in. Generate a conversion table for feet and inches listing the number pairs (1, 12), (2, 24), (3, 36), ...
