LEGS

LEGS are great toys. Keep reading to find out why.

[Writer’s Name]
Legos are terrific toys because...
You can build figures.
You can build different figures.
You whined & lost
only 8 legs
heads, bodies, helmets
and hair. Put them together
to make a figure.

One more reason legos are so cool
out of this world is
you can build structures.
You can put the figures
into the structures
and you can move it around.
Another reason Legos
or so many others is
because you have to put them
when your mom sees them
away but...you can take
them out again and
play with them to build
more on them.

The last reason Legos are
cool is you can
save the instructions
and if they fall apart you
can put them together.
I hope you are convinced that Logos are the best.
