September 2000

Dear Friends,

I am pleased to issue our annual report, *Student Exclusions in Massachusetts Public Schools: 1998-99*. This report provides information regarding student exclusions, defined as the removal of a student from school for disciplinary reasons for more than ten consecutive school days, permanently, or indefinitely. This information will be useful to the legislature, the Governor, and the Board of Education as they continue to address the issues of student discipline and school safety.

The Education Reform Act of 1993 and subsequent amendments authorize school principals rather than school committees to expel students who carry weapons or illegal drugs to school, assault school personnel or are convicted of a felony off school grounds. Districts are not required to provide excluded students with alternative education, with the exception of special education students who under federal law are entitled to receive alternative education if removed from school for ten days or more.

## **Summary of Key Findings**

In the 1998-99 school year, there were 1,326 student exclusions, a decrease of less than one percent from the 1,334 exclusions in the prior year. The total number of exclusions in 1998-99 was the lowest in five years, dropping 11 percent from school year 1996-97, which had 1,498 student exclusions.

In comparison to the total student enrollment, a disproportionate number of students excluded from school were African-American and Hispanic. Students of all racial and ethnic minority groups comprised 23 percent of student enrollment but accounted for 55 percent of student exclusions. Hispanic students, who comprised one-tenth of student enrollment, accounted for nearly one-third of student exclusions. African-American students, nine percent of student enrollment, accounted for 19 percent of student exclusions. Although white students comprised 77 percent of student enrollment, they accounted for 45 percent of student exclusions.

Twenty-nine percent of all exclusions involved a student with a weapon on school premises, an increase of two percentage points from the previous year. Of the 386 exclusions involving a weapon, eight percent involved a gun. The percentage of student exclusions that resulted from possession of an illegal substance (21 percent) slightly decreased from last year. Exclusions resulting from a felony committed outside of school decreased from 10 percent in 1997-98 to seven percent in 1998-99.

There was a decline from last year in the number of both regular education and special education students that were provided alternative services. Sixty-five percent of all students who were excluded from school were provided with alternative education, a decrease of two percentage points from the

1997-98 school year. Among regular education students, 56 percent were provided with alternative education, a decrease of two percentage points from the previous year. Of special education students excluded from school, 92 percent were provided with alternative education, a decrease of four percentage points from the prior year.

For those students who were excluded from school and were provided with alternative education, 57 percent attended an in-district alternative program and 26 percent were provided with home tutoring. In 60 percent of the 467 cases where students were not provided with alternative education, schools chose not to provide it, which is a decline of 10 percentage points from the prior year, and down 15 percentage points from the 1996-97 school year.

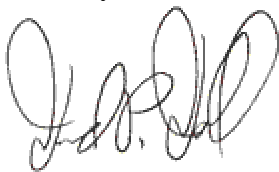

Exclusion rates varied among school districts. Of the 363 school districts in 1998-99, 155 districts, or 43 percent, excluded students from school. Of these 155 districts reporting student exclusions, 85 percent reported fewer than 10 exclusions and the remaining 15 percent, or 23 districts, reported ten or more student exclusions. This is an increase from the prior year when 21 districts reported ten or more student exclusions.

We appreciate the efforts that school districts are making to provide safe and orderly schools and to provide serious learning opportunities for all students. A safe learning environment is essential to an effective education. Many districts do an outstanding job in providing most or all of the students they exclude with an alternative education. That is a very important goal statewide, and school districts must continue to make safe, effective schools a top priority.

If you have any questions or suggestions about the report, please contact:

## STUDENT EXCLUSIONS: 1998-99

### Background

The 1998-99 school year was the sixth year in which the Department of Education required schools to submit student level data on student exclusions. The following analysis is based on data reported by schools on students excluded, as defined above, between July 1, 1998, and June 30, 1999. Data were returned to school districts for verification, and data were edited in cases for which corrections were submitted.

*A student exclusion is defined as the removal of a student from participation in regular school activities for disciplinary purposes for more than ten consecutive school days, permanently, or indefinitely.*

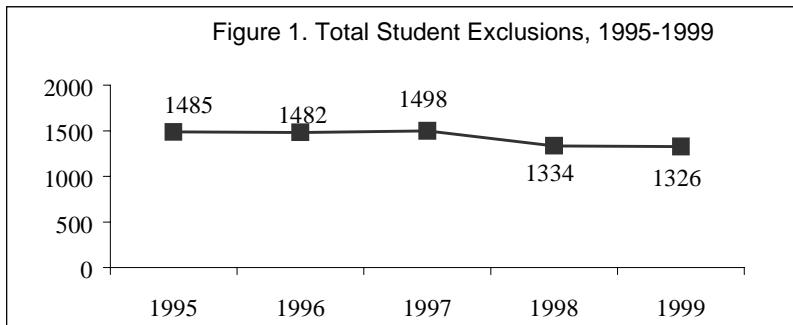

### Results

There were 1,326 student exclusions in the 1998-99 school year from 155 school districts and charter schools. A total of 1,299 students were excluded, of whom 26 were excluded two or more times during the year. The greatest number of exclusions for an individual student was three.

**Table 1. Student Exclusions Over Time**

	1998-99	1997-98	1996-97
Number of Student Exclusions	1,326	1,334	1,498
Number of Individual Students Excluded	1,299	1,276	1,446
Number of Students Excluded More Than Once	26	29	49
Percent of Students Receiving Alternative Education	65%	67%	63%

As shown in Figure 1, the number of student exclusions during the 1998-99 school year was the lowest in five years, decreasing by less than one percent from the previous school year and 11 percent from two years prior. The number of students excluded more than once during the 1998-99 school year decreased by 10 percent from the previous year and by 47 percent from 1996-97.

Nearly two-thirds of the students excluded from school were provided with alternative education, a decrease of two percentage points from the prior year.

## Exclusions by Student Characteristics

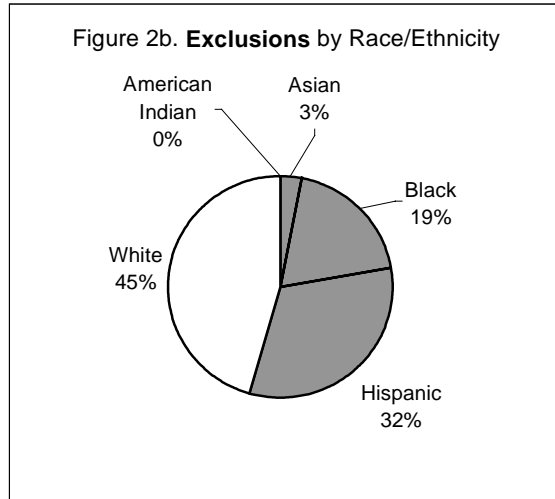

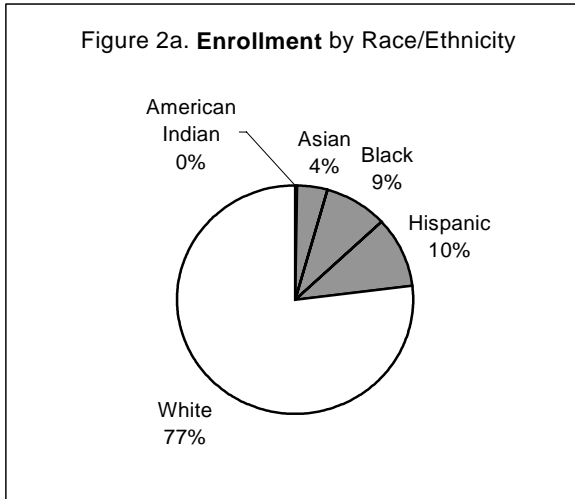

As shown in Table 2, over 80 percent of excluded students were male. The proportion of male exclusions in 1998-99 increased slightly from the previous year. As in past years, male students were excluded at higher rates than female students. Approximately one in every 500 male students was excluded compared to one in every 2,000 female students.

Percentages may not total 100% due to rounding.

In comparison to the total student enrollment for 1998-99, a disproportionate number of students excluded from school were students of color. This pattern has been consistent over time. As shown in Figures 2a and 2b, students of racial and ethnic minority groups comprised 23 percent of the total student enrollment but accounted for 55 percent of student exclusions. Specifically, Hispanic students, almost one-tenth of the total student enrollment, accounted for approximately one-third of student exclusions. African-American students, nine percent of the total student enrollment, accounted for 19 percent of student exclusions. Although white students comprised 77 percent of the total student enrollment, they accounted for 45 percent of student exclusions.

Students who were excluded ranged in age from six to 22-years-old. Female students who were excluded ranged in age from nine to 20-years-old and male students ranged in age from six to 22-years-old. One percent of exclusion cases involved students ages 10 or younger, and 25 percent involved students between the ages of 11 and 13. More than half of student exclusions (56 percent) were among students 14 to 16-years-old, a figure that has remained fairly constant over the past three years. In 1998-99, 15-year-old students accounted for more than 40 percent of student exclusions, while 18 percent of students excluded were between the ages of 17 and 19. Only five exclusions involved students ages 20 or older.

Regular education students, who comprised 83 percent of the total student enrollment, accounted for 75 percent of student exclusions. Special education students, who comprised 17 percent of the total enrollment, accounted for 25 percent of exclusions. The proportion of special education students among student exclusions increased four percentage points from the 1997-98 school year and is comparable to the proportion in 1996-97 (24 percent).

**Table 3. Exclusions by Program Status, Gender, and Grade**

Grades	Regular Education				Special Education				Totals	
	Males		Females		Males		Females		#	%
	#	%	#	%	#	%	#	%	#	%

<b>Totals</b>	<b>805</b>		<b>189</b>		<b>292</b>		<b>40</b>		<b>1,326</b>	

Percentages may not total 100% due to rounding.

As illustrated in Table 3, student exclusions occurred in grades one through 12 for males and in grades five through 12 for females. The majority of student exclusions for both regular and special education students occurred at grades six through 11 for both males and females. Two percent of student exclusions were in grades one through five. Thirty-nine percent of student exclusions were in grades six through eight, and 59 percent were in grades nine through 12.

As shown in Table 4, while the majority of exclusions occurred in the middle to upper grades (six to 12) for students in all racial/ethnic groups, Hispanic students were excluded at every grade level. In addition, a greater number of Hispanic students were excluded than students of other racial/ethnic groups in grades six, seven, and eight.

### Exclusions by Type of Offense

Schools reported one or more offenses for each student exclusion. Figure 3 illustrates the number of exclusions that occurred for each of the offenses specified in state law as actions for which school principals are authorized to expel students, and for “other” offenses. Exclusions resulting from more than one offense are displayed as either a “weapon combination” or a “non-weapon combination.”

As shown in Table 5, exclusions due to weapons on school premises have gradually increased over the past three years. In school year 1998-99, 29 percent of student exclusions involved weapons on school premises. Of the 386 exclusions that involved a weapon, 68 percent involved a knife, virtually unchanged from the prior year. Nearly eight percent involved a gun, an increase from the previous year, and two percent involved an explosive or incendiary device, a decrease of almost five percentage points from the previous year. Some other type of weapon accounted for 20 percent of student exclusions involving a weapon, a slight increase from the previous year. The other types of weapons most often reported were razor blades or box cutters, various tools, bats and clubs.

Over one-fifth of exclusions were for possession of an illegal substance, a slight decrease from the previous year. Approximately 13 percent of exclusions were for assaults on school staff, a slight decrease from the previous year, and nine percent of exclusions were for assaults on students, similar to the two previous years. Seven percent of student exclusions were for a felony committed outside of school, a decrease of nearly three percentage points from the previous year. Exclusions for an offense reported as “other” accounted for 16 percent of the student exclusions.

**Table 5. Exclusions by Type of Offense**

	1998-99		1997-98		1996-97	
	#	%	#	%	#	%
Weapon on school premises	319	24	306	23	317	21

More than one weapon	8	2	0		0	
Not Reported	0		1	0	1	0

Percentages may not total 100% due to rounding.

\*Data are for all exclusions involving weapons, including weapons violations in combination with other offenses (n=386).

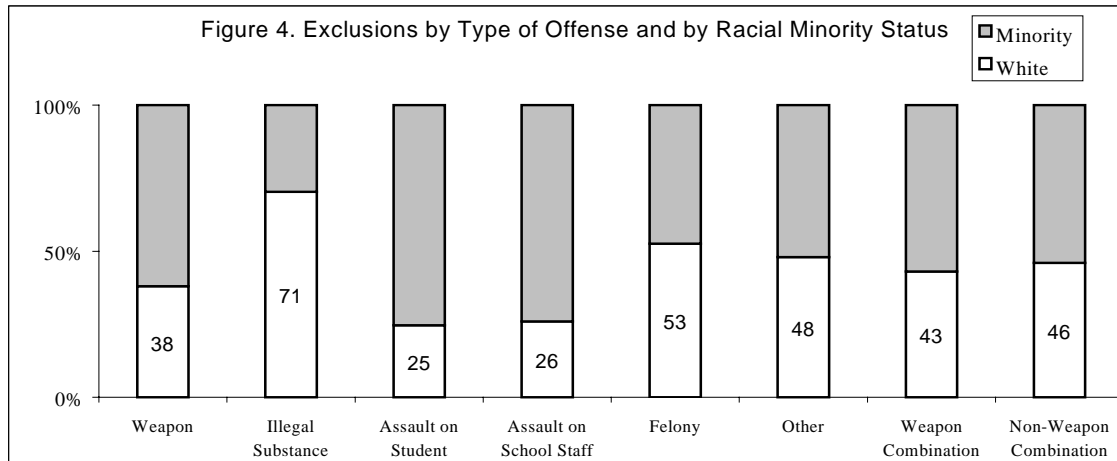

Figure 4 compares the distribution of exclusions for each type of offense for racial/ethnic minority students and for white students. Minority students accounted for 62 to 75 percent of exclusions for weapons violations, assaults on staff, and assaults on students, while white students accounted for 71 percent of exclusions for possession of illegal substances.

### Exclusions by Length of Time

Schools were asked to report the date the student was excluded and either the date the student returned to school or was eligible to return to school, or that the exclusion was permanent. For the first time in 1999, the Department collected data specifically on the number of *school days* a student missed due to exclusion from school, compared to past years when data were reported for calendar days. In 1999, 12 percent of student exclusions occurred for 11 to 20 school days, approximately one-third (35 percent) were for 21 to 40 days and 29 percent were for 41 to 179 days. Ten percent of student exclusions occurred for one school year (180 school days), and one percent lasted longer than one school year.

Approximately 14 percent were permanent exclusions, commonly referred to as expulsions. As shown in Table 6, 22 percent of white students who were excluded from school were removed permanently, compared to five percent of Asian-American students, six percent of Hispanic students, and six percent of African-American students. No American Indian students were excluded permanently.

**Table 6. Length of Exclusion\* by Race/Ethnicity**

	American Indian		Asian		Black		Hispanic		White	
	#	%	#	%	#	%	#	%	#	%
11-20 school days			3	8	25	10	55	13	76	13
21-40 school days	1	100	10	27	98	38	193	45	158	26
41-179 school days			16	43	72	28	94	22	199	33
180 days (one school year)			6	16	43	17	57	13	33	6
Longer than one school year					3	1	3	1	1	0
Permanent			2	5	16	6	27	6	135	22
<b>Totals</b>	<b>1</b>		<b>37</b>		<b>257</b>		<b>429</b>		<b>602</b>	

Percentages may not total 100% due to rounding. \*Previous reports included analyses of exclusions by calendar days that are not comparable.

**Alternative Education**

As shown in Table 7, 65 percent of all students excluded from school in 1998-99 were provided with alternative education, a decrease of two percentage points from the previous year. Fifty-six percent of regular education students excluded from school received alternative education, a decrease of two percentage points from the prior year. Federal law requires special education students who are excluded from school to be offered alternative education. Ninety-two percent of the special education students excluded in 1998-99 received alternative education, while eight percent did not. This is an increase of three percentage points from the previous year. Of the 27 special education students who did not receive alternative education, 12 were reported as having refused or not responded to the offer of alternative education, nine were reported as having been incarcerated, five had moved, and for one student the school chose not to provide it.

For the first time this school year, the Department collected data on how special education students were removed from school. Twenty-six special education students were removed by an impartial hearing officer to an alternative setting, and the remaining 306 were removed by school personnel to an alternative setting.

**Table 7. Alternative Education by Program Status**

	1998-99		1997-98		1996-97	
	#	%	#	%	#	%
<b>All Students</b>						
Alternative education provided	859	65	887	67	942	63
Alternative education not provided	467	35	439	33	538	36

<b>Special Education Referrals</b>						
Alternative education provided	0		11	92	6	67
Alternative education not provided	0		1	8	3	33
Not reported	0		0		0	

Percentages may not total 100% due to rounding.

Table 8 illustrates that of the 859 exclusions in which students were excluded from school and provided with alternative education, 57 percent attended an in-district alternative program, 26 percent were provided with home tutoring, and 12 percent received alternative education in a private setting. The remaining two programs, work/community service and an alternative program in another district, accounted for the remaining six percent of student exclusions.

In 60 percent of the 467 exclusion cases where alternative education was not provided, schools chose not to provide it. This was a decrease of 10 percentage points from the prior year, and a decline of 15 percentage points from the 1996-97 school year. For nearly one-third of all exclusions, the schools reported that students refused to accept or did not respond to offers of alternative education, an increase of 10 percentage points from the previous year. For the remaining 10 percent of exclusions, students had moved or were incarcerated. The number of excluded students who were incarcerated had more than doubled from the previous year (see Table 8).

**Table 8. Alternative Education**

<b>Types of Alternative Education Provided</b>	1998-99		1997-98		1996-97	
	#	%	#	%	#	%
Home tutoring	221	26	254	29	247	26
In-district alternative program	489	57	505	57	579	62
Alternative program in another district	45	5	28	3	14	2
Private alternative setting	99	12	91	10	94	10
Work/community service setting	5	1	6	1	2	0
Not reported	0		3	0	6	1
<b>Reason Alt. Education Was Not Provided</b>						
Student moved/transferred	23	5	17	4	30	6
Student refused/did not respond	138	30	88	20	80	15
Student was incarcerated	24	5	11	3	8	2
School chose not to provide it	282	60	307	70	405	75
Not reported	0		16	4	15	3

Percentages may not total 100% due to rounding.

The provision of alternative education varied by the length of the exclusion. Nearly 58 percent of regular education students who were excluded from school for one year were provided with alternative education. About 45 percent of regular education students who were excluded for 11 to 20 days received alternative education, and nearly 71 percent of regular education students who were excluded 21 to 40 days received alternative education. Almost 47 percent of regular education students who were excluded for 41 to 179 days received alternative education. Just about one-fifth of the regular education students who were excluded permanently received alternative education, and three-quarters of the special education students who were excluded permanently received alternative education.

### **Exclusions by District**

As shown in Table 9, over half of the 363 school districts reported no student exclusions for the 1998-99 school year. A total of 155 districts, or 43 percent, excluded students from school. One-quarter of the school districts reported between one and three exclusions. Twelve percent of the school districts reported between four and nine student exclusions, and seven percent, or 23 districts, reported ten or more student exclusions. This is an increase from the prior year when 21 districts reported ten or more student exclusions (see Table 10).

**Table 9. Distribution of School Districts by Number of Exclusions**

Southern Berkshire	11	10	82				
Northeast Metro Voc.	11	10	64				

Rates of student exclusions per 1000 students enrolled (as of Oct. 1) are rounded to nearest whole numbers.

Although some districts may have excluded more than 10 students from school, due to their large enrollment they had fewer than four exclusions per 1000 students enrolled in the district. Other districts had fewer than 10 student exclusions, but had four or more exclusions per 1000 students. As illustrated in Table 11, there were 23 districts reporting four or more student exclusions per 1000 students in 1998-99 compared to 16 districts in 1997-98.

**Table 11. Districts with Four or More Student Exclusions per 1000 Students**
