*David P. Driscoll
Commissioner of Education*

April 1, 2005

Dear Superintendents, Educators and Other Partners in Public Education:

I am pleased to release the Department of Education's second annual report, "Grade Retention in Massachusetts: 2003-04." This report provides important information on statewide student grade retention statistics, including retention data by grade level, race/ethnicity, gender, in special education status, limited English proficiency status, and low-income and Title I status.

Additionally, the report provides a comparison of retention data and MCAS (Massachusetts Comprehensive Assessment System) scores.

I hope that you find the enclosed information useful.

Sincerely,

David P. Driscoll
Commissioner of Education

EXECUTIVE SUMMARY

This report, *Grade Retention in Massachusetts Public Schools*, is the second retention report published by the Massachusetts Department of Education (MADOE) to provide districts and the public general information on retentions in Massachusetts. Retention is defined as when a student is required to repeat the grade in which they were enrolled the previous year. This report concentrates on statewide retention statistics, and includes data on retentions by grade level, race/ethnicity, gender, special education status, limited English proficient status, low-income status, Title I status, and a comparison of retention data and the Massachusetts Comprehensive Assessment System (MCAS) scores.

Beginning in 2002-03 the MADOE calculated retention data based on student-level data submitted via the Student Information Management System (SIMS). The methodology used for this report is consistent with the methodology for the 2002-03 retention report. Prior to that year, districts submitted aggregate-level retention data to the MADOE.

Retentions are determined for all Massachusetts public school students in grades one through twelve. Any student reported to be in the same grade in both October 2002 and October 2003 is counted as a retained student for the 2003-04 school year. In this report, retention data are reported as both a number and a rate (the number of students retained divided by the enrollment).

There are several limitations to consider when evaluating the retention statistics: 1) each district and/or school has its own criteria for retaining students, 2) there are possible inconsistencies in the longitudinal data due to the recent methodology change to the Student Information Management System (SIMS), and 3) the quality of the data is dependent on the accurate reporting of student level information from districts.

In the 2003-04 school year, Massachusetts public schools retained 23,098 students, equivalent to a statewide retention rate of 2.6 percent.

For the 2003-04 school year:

- Retention rates for individual grade levels ranged from 0.6 in grade five to 8.0 percent in grade nine.
- Hispanic students had the highest retention rate at 5.9 percent. White students had the lowest retention rate at 1.7 percent.
- When retention is examined by grade and race, African American students in grade nine had the highest retention rate at 17.1 percent. Native American students in grade five had the lowest grade by race retention rate at 0.0 percent.
- Consistent with previous years, male students had a retention rate (3.1 percent) one percentage point higher than female students (2.1 percent).
- Students receiving special education services had a retention rate of 5.1 percent while general education students had a retention rate of 2.2 percent.
- Retention rates for special education students varied depending on the nature of the student's primary disability from 2.7 percent (traumatic brain injury) to 9.4 percent (intellectual impairments).

- Students who were limited English proficient (LEP) had a retention rate of 5.7 percent while non-LEP students had a retention rate of 2.4 percent.
- Low-income students, those students eligible for free or reduced price lunch, had a retention rate of 5.0 percent while non-low income students had a retention rate of 1.7 percent.
- Students receiving Title I services had a retention rate of 5.0 percent while schools retained students not receiving Title I services at a rate of 1.9 percent.

A new addition to this report is the Massachusetts Comprehensive Assessment System (MCAS) data. Although MCAS results are not required when making decisions involving the retention of students, it is important to include MCAS data to provide further knowledge about retentions in Massachusetts. This report includes a comparison of 2003 and 2004 MCAS scores for all students retained in 2003-04.

Overall, the majority (about 94 percent) of retained students with a MCAS performance level for both school years received either the same or higher performance level in 2004. About 6 percent of retained students with a MCAS performance level for both school years received a lower performance level in 2004 than 2003.

INTRODUCTION

This report, *Grade Retention in Massachusetts Public Schools*, is the second retention report published by the Massachusetts Department of Education (MADOE) to provide districts and the public general information on retentions in Massachusetts. The intent of this retention report is not to draw conclusions or make recommendations on the current state of retentions in Massachusetts. Rather, the purpose of this report is to provide general data on retentions, which may be used by district staff and other education leaders to improve school programs. The retention information is important for creating, revising, and maintaining strategies and programs for successful student attainment.

Retention is defined as repeating a grade – a student is retained when they are required to repeat the grade in which they were enrolled in the previous year. For the 2003-04 school year, retained students were reported to be enrolled in the same grade as they were in during 2002-03.

Report Outline

This report is an analysis of students retained in the 2003-04 school year and concentrates on the following areas:

- State total retentions and longitudinal analysis
- State retention by grade level
- State retention by subgroup
 - Race/Ethnicity
 - Gender
 - Special Education
 - Limited English proficient (LEP)
 - Low Income
 - Title I status
- State retention and MCAS scores

Each section contains a brief summary of the statistics and includes graphs and tables detailing the data where appropriate. In addition, there are two appendices at the end of the report: 1) district retention rates by grade level and 2) district retention rates by race/ethnicity categories.

METHODOLOGY

In this report, the MADOE used the same methodology to determine the number and percentage of students retained in Massachusetts as used last year (2002-03 school year). Prior to the 2002-03 school year, the MADOE collected retention data in the aggregate form.

Population

Massachusetts retention data are based on the public school population that included all students enrolled in grades one through twelve in the 2002-03 and 2003-04 school years.

Data Source

The sources for the data presented are the October 2002 and October 2003 Student Information Management System (SIMS), which were used to collect student level data on all public school students in Massachusetts. Student level data in this report include grade, race, gender, special education status, limited English proficient status, low-income status, and Title I status. Massachusetts Comprehensive Assessment System (MCAS) results are also cited in this report.

Data Calculations

Any student reported to be enrolled in the same grade in both the October 2002 and October 2003 SIMS is counted as a retained student for the 2003-04 school year. In this report, retention data are reported as both a number and a rate (the number of students retained divided by the enrollment).

Data Definitions

Throughout this report, data are frequently reported as a number or rate. The *number of students* retained represents students who were reported as repeating the same grade as the prior school year. The *retention rate* is the number of students retained divided by the enrollment. For example, the retention rate for female students is the number of female students retained divided by the number of female students enrolled.

Limitations

There are three main limitations to consider regarding the statewide retention data in this report:

- 1) Every district uses its own guidelines when retaining students.
- 2) Massachusetts recently updated its data collection system, thus changing the data source for retention data.
- 3) Accurate data are dependent on correct district reporting of student level information.

Every district in Massachusetts can have its own criteria for retaining students; therefore, it is possible that there are policy differences between the districts. Accurate interpretation of the results may be problematic due to policy differences – for example, it is not possible to determine from this data whether an increase or decrease in retentions is due to a student achievement change or due to a policy change. To address this limitation, it is important to consider retention at the district level as well the state level. While district-level data is not summarized in this report, the appendices contain district-level retention data.

Due to the recent changes in methodology for collecting retention data, it is possible that there are some inconsistent results on retention statistics. Prior to the 2002-03 school year, the MADOE collected retention data at the aggregate level via the “Year-End School Indicator Report” (YESIR). Districts reported retentions by gender, race/ethnicity, and grade. Beginning in the 2002-03 school year, the MADOE calculated student-level information on retentions from data submitted via the SIMS. It is not possible to have longitudinal analyses on all the subgroups described in this report because the previous data collection method was at the aggregate level on

a limited number of subgroups. Longitudinal analysis is restricted to the overall state numbers and percentages.

Finally, the quality of the data is dependent on the accurate reporting of student-level information from districts. While the MADOE does attempt to catch inaccurate reporting, a formal auditing process for the quality of the student-level data is not in place. However, the consistency of the statewide retention data over the last several years may suggest overall reliability of the data. In this report, the MADOE decided to remove four districts' data due to inaccurate reporting. The data for these four districts was excluded from all state calculations as well as the district appendices. The removal of these districts' data does not affect the overall state total retention rate.

STATE TOTALS OVERVIEW

In the 2003-04 school year, there were 887,175 total students enrolled in Massachusetts public schools in grades one through twelve. Out of this total, schools retained 23,098 students in the grade they were in for the 2002-03 school year. This number represents 2.6 percent of all Massachusetts public school students in grades one through twelve.

Figure 1: State Percentage of Retained and Not Retained Students

Longitudinal State Totals

The 2.6 percent state retention rate for 2003-04 was the same as the retention rate for the 2002-03 school year. This rate is also similar to the retention rates from the prior four school years. The state retention rate increased from 1995 to 2000 and has remained steady since 2000.

Table 1: State Retentions from 1995 to 2004

	Year								
	1995	1996	1998	1999	2000	2001	2002	2003	2004
Total Enrollment	757,737	814,599	852,841	867,486	77,786	888,329	883,911	890,862	887,175
Number Retained	16,213	16,730	17,929	20,245	22,424	22,562	22,428	23,551	23,098
Retention Rate	2.0%	2.1%	2.1%	2.3%	2.6%	2.5%	2.5%	2.6%	2.6%

Figure 2: State Retention Rates: 1995 to 2004

STATE RETENTION BY GRADE LEVEL

Retention rates for individual grade levels ranged from 0.6 to 8.0 percent. Overall, schools retained grade nine students at a higher rate than all other grades. Out of the 83,639 students enrolled in grade nine, 6,682 were retained. This equals a retention rate of 8.0 percent, which is nearly four percentage points higher than any other grade retention rate. The grade nine retentions accounted for 28.9 percent of all retentions.

Grades ten, one, and eleven had the next highest retention rates at 4.2, 4.1, and 3.1 percent respectively. These grades – one, nine, ten, and eleven – accounted for over 64 percent of the total retentions. The remaining grades had retention rates lower than the state retention rate of

2.6 percent. The retention rates by grade were consistent with the rates by grade in 2001, 2002, and 2003.

Figure 3: Retention Rates by Grade Level

**Table 2: Retention Rates by Grade Level
(Sorted by Highest to Lowest Rates)**

Grade	Number Retained	Retention Rate
9	6,682	8.0%
10	3,120	4.2%
1	2,989	4.1%
11	2,123	3.1%
12	1,327	2.1%
2	1,368	1.9%
7	1,413	1.8%
3	1,190	1.6%
8	1,084	1.4%
6	792	1.0%
4	563	0.8%
5	447	0.6%

Figure 4: Retention Rate by Grade: 2001 to 2004

Table 3: Retention Rate by Grade: 2001 to 2004

Grade	Year			
	2001	2002	2003	2004
1	3.7%	3.8%	4.1%	4.1%
2	1.7%	1.7%	1.9%	1.9%
3	1.6%	1.6%	1.9%	1.6%

6	1.2%	1.2%	1.3%	1.0%
7	1.7%	1.5%	1.6%	1.8%
8	1.5%	1.4%	1.4%	1.4%
9	8.4%	8.4%	8.5%	8.0%
10	4.3%	4.7%	4.2%	4.2%
11	3.2%	3.1%	3.1%	3.1%
12	2.1%	1.7%	1.7%	2.1%

STATE RETENTIONS BY SUBGROUP

Below is an analysis of retentions by several subgroups: race/ethnicity, gender, special education status, limited English proficient (LEP) status, low-income status, and Title I status.

Race/Ethnicity

There are five race/ethnicity categories reported in the SIMS: Native American, Asian or Pacific Islander, African American, White, or Hispanic. *Hispanic* students had the highest retention rates at 5.9 percent, followed by *African American* students at a rate of 5.8 percent and *Native American* students at a rate of 3.6 percent. *Asian* and *White* students had the lowest retention rates at 2.4 and 1.7 percents respectively. These race/ethnicity rates are consistent with the rates from the 2003 school year.

Table 4: Retention by Race/Ethnicity

	RACE					TOTAL
	African American	Asian	Hispanic	Native American	White	
Total Enrollment	79,222	41,489	101,783	2,764	661,917	887,175
Number Retained	4,614	990	5,961	99	11,434	23,098
Retention Rate	5.8%	2.4%	5.9%	3.6%	1.7%	2.6%

Race/Ethnicity by Grade

When disaggregating the data for both grade and race, grade nine African American students had the highest retention rate at 17.1 percent. The grade nine Hispanic student retention rate of 16.8 percent was the next highest grade by race combination, followed by the grade nine Native American or Alaskan Native student retention rate of 12.3 percent. The lowest grade by race retention rates were for grade five Native American students (0.0 percent), grade four White students (0.4 percent), and grade five White students (0.4 percent).

Table 5: Retention by Race/Ethnicity and Grade
(Numbers are percentages)

RACE	GRADE												TOTAL
	1	2	3	4	5	6	7	8	9	10	11	12	
African American	7.5	4.0	5.2	1.9	1.4	3.1	3.9	2.7	17.1	9.4	5.7	5.4	5.8
Asian	3.5	1.6	1.5	0.8	0.5	0.8	2.0	1.0	7.5	3.7	3.0	2.6	2.4
Hispanic	8.5	4.2	3.6	1.9	1.4	2.7	4.2	3.1	16.8	9.6	7.3	5.4	5.9
Native American	5.1	3.4	2.0	1.8	0.0	1.7	3.8	1.3	12.3	4.8	3.2	2.7	3.6
White	3.0	1.3	0.9	0.4	0.4	0.5	1.2	1.0	5.2	2.9	2.3	1.4	1.7
TOTAL	4.1	1.9	1.6	0.8	0.6	1.0	1.8	1.4	8.0	4.2	3.1	2.1	2.6

Gender

Male students had a retention rate of 3.1 percent and female students had a retention rate of 2.1 percent. This difference of one percentage point is consistent with the overall gender retention trend demonstrated over the last five years, with males retained at consistently higher rates than females.

Figure 5: Retention Rates by Gender: 1999 to 2004

Table 6: Retention Rates by Gender 1999 to 2004

Year	Male	Female
1999	2.8%	1.9%
2000	3.0%	2.1%
2001	3.0%	2.0%
2002	3.0%	2.1%
2003	3.1%	2.2%
2004	3.1%	2.1%

Special Education Status

Students eligible for special education services were identified to have a disability(ies), and consequently, are unable to progress effectively in the general education program without specially designed instruction. Special education students had a retention rate of 5.1 percent, compared to a rate of 2.2 percent for general education students. In other words, special education students composed 14.6 percent of all enrolled students in Massachusetts in grades one through twelve and accounted for 28.3 percent of all retentions. Alternately, general education students composed 85.4 percent of enrolled students in grades one through twelve and 71.7 percent of all retentions.

Figure 6: Retention Rates by Special Education Status

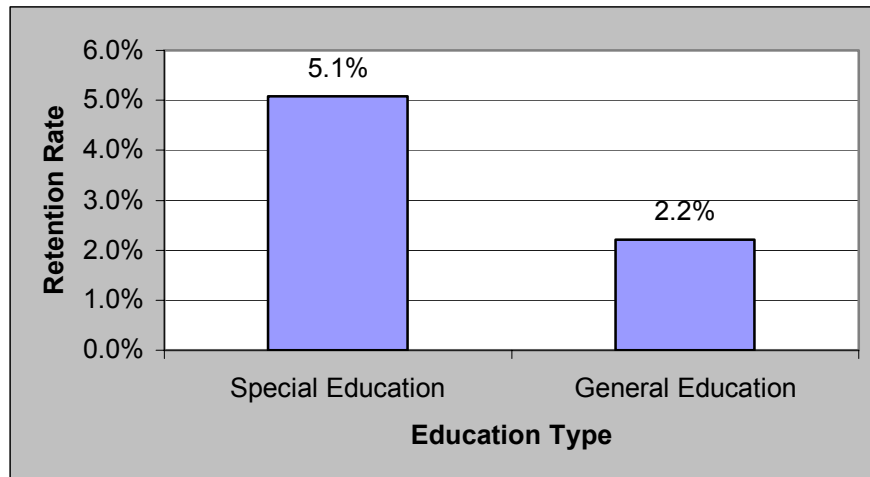

Figure 7: Percentage of General Education and Special Education Retentions

Nature of Primary Disability

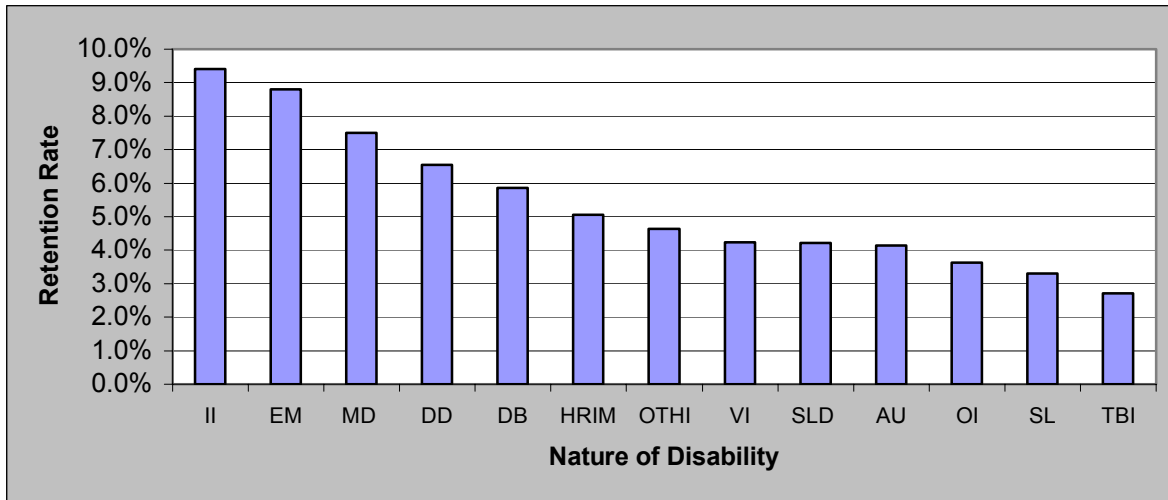

All students with disabilities, irrespective of the type, were retained at a rate above the state average of 2.6 percent. However, within the special education category, retention rates differed based on the identified primary disability.

The disability with the lowest retention rate was traumatic brain injury with a rate of 2.7 percent, and the disability with the highest retention rate was intellectual impairment at 9.4 percent. Out of the 13 categories of primary disabilities, three categories – specific learning disabilities, intellectual impairments, and emotional impairments – composed 73 percent of all retentions among special education students.

Table 7: Retention Rates by Nature of Disability
(Sorted from Highest to Lowest Retention Rate)

Disability	Enrollment	Number Retained	Retention Rate
Intellectual Impairments	11,174	1,048	9.4%
Emotional	9,239	817	8.8%
Multiple Disabilities	3,298	248	7.5%
Developmental Delay	7,370	480	6.5%
Deaf-Blindness	205	12	5.9%
Sensory/Hearing	693	35	5.1%
Health	5093	236	4.6%
Sensory/Vision	354	15	4.2%
Specific Learning Disability	69,489	2,903	4.2%
Autism	2,638	109	4.1%
Physical	883	32	3.6%
Communication	15,457	509	3.3%
Traumatic Brain Injury	3,747	101	2.7%

Figure 8: Retention Rates by Nature of Disability

II = Intellectual Impairments	EM = Emotional
MD = Multiple Disabilities	DD = Developmental Delay
DB = Deaf-Blindness	HRIM = Sensory/Hearing
OTHI = Health	VI = Sensory/Vision
SLD = Specific Learning Disability	AU = Autism
OI = Physical	SL = Communication
TBI = Traumatic Brain Injury	

Limited English Proficient Status

Limited English proficient (LEP) students were those students: 1) who do not speak English or 2) whose native language is not English and who currently cannot perform ordinary classroom work in English. Students that were identified as LEP had a retention rate of 5.7 percent, while non-LEP students were retained at a rate of 2.4 percent. In other words, LEP students composed 10.6 percent of all retentions in the state and comprised 4.9 percent of the grades one through twelve student population.

Figure 9: Retention Rate by Limited English Proficient (LEP) Status

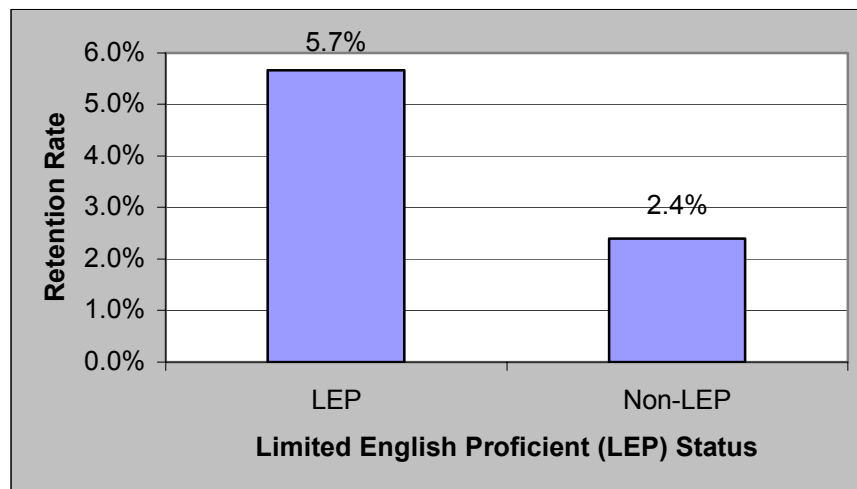

Figure 10: Percentage of LEP and Non-LEP Students Retentions

Low-Income Status

Students are identified as “low-income” if they are eligible for free or reduced-price lunch. Students identified as low-income were retained at a rate of 5.0 percent while students not considered low-income were retained at a rate of 1.7 percent. Low-income students comprised approximately 28 percent of all students in grades one through twelve and accounted for over 50 percent of all retentions in Massachusetts.

Figure 11: Retention Rate by Low-Income Status

Figure 12: Percentage of Low-Income and Non-Low-Income Retentions

Title I Status

Students receiving any type of Title I service were included in this category. Title I provides additional support and resources to students in high-poverty schools and districts. Students receiving Title I services were retained at a rate of 5.0 percent, while those not receiving Title I services were retained at a rate of 1.9 percent. In other words, Title I students composed 23.8 percent of all enrolled students and 45.1 percent of all retentions.

Figure 13: Retention Rates by Title I Status

Figure 14: Percentage of Title I and Non-Title I Retentions

STATE RETENTIONS AND THE MCAS

The Massachusetts Comprehensive Assessment System (MCAS) is administered to all students in grades three (English Language Arts), four (English Language Arts and Mathematics), six (Mathematics), seven (English Language Arts), eight (Mathematics), and ten (English Language Arts and Mathematics). While MCAS results are not required by the state for determining whether a student should be retained, they are an important indicator of the academic performance of retained students.

Reporting of student results on the MCAS tests varies slightly according to grade. Results on the grade three test are reported in terms of three performance levels: *Proficient*, *Needs Improvement*, and *Warning*. At grades four through eight, MCAS results are reported according to four performance levels: *Advanced*, *Proficient*, *Needs Improvement*, and *Warning*. At grade 10 there are also four levels: *Advanced*, *Proficient*, *Needs Improvement*, and *Failing*.

The following tables represent a comparison by grade level of the MCAS performance levels of students retained in the 2004 school year. In this report, MCAS results from 2003 and 2004 were matched with all retained students. For example, if a student is retained in grade eight, the 2003 score represents the first year they were in grade eight, and the 2004 score is for the year that they were retained (repeating grade eight).

For each grade level, there is a table comparing the overall differences in number and percentage of retained students at the main performance levels described above from 2003 to 2004. There is also the number and percentage for students with test statuses such as medically exempt, LEP exempt, or incomplete test as well as the number and percentage of retained students with no available MCAS records.

Following each of the comparison tables there are additional tables that break down the performance level differences for retained students from 2003 to 2004. Every 2003 performance level number and percentage is broken down by performance levels for 2004. For example, grade three students with a performance level of “Needs Improvement” in 2003 are broken down by their performance levels for 2004 (Proficient, Needs Improvement, Warning, Other Performance Levels, and No Record).

Grade Three

There were 1,190 retained grade three students in the 2004 school year. Out of the 1,190 retained students, 846 (71 percent) had a MCAS result for both 2003 and 2004 and 30 percent did not have a MCAS record or did not receive a performance level for one or both years. Of the 846 retained students with a MCAS result in both years:

- 49 percent (414 students) received a higher performance level in 2004 than 2003.
- 3 percent (26 students) received a lower performance level in 2004 than in 2003.
- 48 percent (406 students) received the same performance level in both 2003 and 2004 school years.

**Table 8: MCAS Performance Level Comparison:
Grade Three Retained Students 2003 to 2004**

Performance Level	Year			
	2003		2004	
	#	%	#	%
Proficient	95	8.0%	334	28.0%
Needs Improvement	500	42.0%	541	45.4%
Warning	394	33.1%	164	13.7%
Other Test Status	13	1.1%	1	0.1%
No Record	188	15.8%	150	12.7%

**Table 9: Grade Three

---	---	---	--	---	--

Grade Four

English Language Arts

There were 563 retained grade four students in the 2004 school year. Out of the grade four retained students, 363, or 64 percent, had a MCAS result for both 2003 and 2004 in English Language Arts. Thirty-six percent did not have a performance level or MCAS record for one or both years. Of the 563 retained students with a MCAS result for both years:

- 52 percent (189 students) received a higher performance level in 2004 than 2003
- 6 percent (21 students) received a lower performance level in 2004 than in 2003
- 42 percent (153 students) received the same performance level in both 2003 and 2004 school years

**Table 10: MCAS Performance Level Comparison:
Grade Four Retained Students (ELA)
2003 to 2004**

Performance Level	Year			
	2003		2004	
	#	%	#	%
Advanced	2	0.4%	4	0.7%

Mathematics

Similar to the grade four English Language Arts MCAS results, out of the 563 grade four retained students, 373, or 66 percent, had a MCAS result for both 2003 and 2004 in math. Thirty-four percent did not have a performance level or MCAS record for one or both years. Of the 563 retained students with a MCAS result for both years:

- 52 percent (195 students) received a higher performance level in 2004 than 2003
- 4 percent (15 students) received a lower performance level in 2004 than 2003
- 44 percent (163 students) received the same performance level in 2003 and 2004

Grade Six

There were 792 retained grade six students in the 2004 school year. Out of the grade six retained students, 579, or 73 percent, had a MCAS result for both 2003 and 2004. Twenty-seven percent did not have a performance level or MCAS record for one or both years. Of the 652 retained students with a MCAS result for both years:

- 28 percent (159 students) received a higher performance level in 2004 than 2003
- 4 percent (25 students) received a lower performance level in 2004 than in 2003
- 68 percent (395 students) received the same performance level in both 2003 and 2004 school years

Grade Seven

There were 1,413 retained grade six students in the 2004 school year. Out of the grade seven retained students, 931, or 66 percent, had a MCAS result for both 2003 and 2004 school years. Twenty-eight percent did not have a performance level or MCAS record for one or both years. Of the 931 retained students with a MCAS result for both years:

- 29 percent (268 students) received a higher performance level in 2004 than 2003
- 11 percent (100 students) received a lower performance level in 2004 than in 2003
- 60 percent (563 students) received the same performance level in both 2003 and 2004 school years

Grade Eight

There were 1,084 retained grade eight students in the 2004 school year. Out of the grade eight retained students, 754, or 70 percent, had a MCAS result for both 2003 and 2004 school years. Thirty percent did not have a performance level or MCAS record for one or both years. Of the 754 retained students with a MCAS result for both years:

- 25 percent (191 students) received a higher performance level in 2004 than 2003
- 4 percent (27 students) received a lower performance level in 2004 than in 2003
- 71 percent (536 students) received the performance level score in both 2003 and 2004 school years

Grade Ten

The MADOE does not require retained grade ten students to take the regular administration of the MCAS for the year they are retained. Therefore, a comparison of 2003 and 2004 MCAS results is not included in this report.

SUMMARY OF FINDINGS

There were 23,098 retained students equaling a retention rate of 2.6 percent. This retention rate is the same as the 2002-03 retention rate, and is consistent with the state retention rate since 2000.

Retention rates for individual grades ranged from 0.6 to 8.0 percent. Grade five students had the lowest retention rate at 0.6 percent and grade nine students had the highest rate at 8.0 percent. This retention rate variation among grade levels is consistent with the 2003 rates.

Retention rates among race/ethnicity groups ranged from 1.7 percent (White students) to 5.9 percent (Hispanic students). African American students had a state retention rate of 5.8 percent, Native American students had a retention rate of 3.6 percent, and Asian students had a rate of 2.4 percent. Out of all grade by race combinations, grade five Native American students had the lowest rate at 0.0 percent, while grade nine African American students had the highest retention rate at 17.1 percent.

Male students had a retention rate one percentage point higher than female students. Male students had a retention rate of 3.1 percent while female students had a retention rate of 2.1 percent. This gender difference is consistent with data collected over the last five years.

Schools retained special education students at a higher rate than general education students. Special education students had a retention rate of 5.1 percent and general education students have a retention rate of 2.2 percent. Retention rates varied among the nature of student's primary disability from 2.7 percent (traumatic brain injury) to 9.4 percent (intellectual impairments).

Limited English Proficient (LEP) students had a higher retention rate than non-LEP students. LEP students had a retention rate of 5.7 percent and non-LEP students have a retention rate of 2.4 percent.

Low-income students had a higher retention rate than non-low-income students. The retention rate for low-income students was 5.0 percent and the retention rate for non-low-income students was 1.7 percent.

Schools retained Title I students at a higher rate than non-Title I students. Students receiving Title I services were retained at a rate of 5.0 percent and students not receiving Title I services had a retention rate of 1.9 percent.

Overall, the majority (about 94 percent) of retained students with a MCAS performance level for both school years received either the same or higher performance level in 2004. About 6 percent of retained students with a MCAS performance level for both school years received a lower performance level in 2004 than 2003.
