

11 The first five terms in a number pattern are shown below.

7, 10, 13, 16, 19

The pattern continues using the same rule.

- What is the next term in the pattern? Show or explain how you got your answer.
- What is the 20th term in the pattern? Show or explain how you got your answer.
- Write an expression that can be used to find the value of the n th term in the pattern.
