

11

A company specializes in manufacturing clothes made of delicate fabrics such as silk, lace, and nylon. The company owner is considering purchasing a robotic system that can be programmed to apply fasteners, such as buttons and snaps, to clothing items.

- a. Describe **two** benefits of using a robotic system to apply fasteners to clothing items manufactured by this company.
- b. Identify **two** reasons the owner of the company may **not** want to purchase a robotic system for the task of applying fasteners to clothing items. Explain your reasoning.
