Classroom Observation Checklist
Pre-School/Kindergarten
Required documentation for Component 4

Student ____________________________________________________ Grade ___________________
Class/location observed (include teacher name) _____________________________________________
Observer name and title ___________________________ Date of observation __________

This tool is designed for use as a guide during a student observation. You may not see all domains addressed, however, the student should be observed during times when you will be able to monitor behaviors related to the area of concern. If the child is 3-5 years old and not yet in school the observation should be conducted in the child’s natural environment or early intervention program.

In order to obtain a full and accurate picture of the student’s performance, it may be necessary to observe the student more than once, in different settings and at different times of the day. Multiple observation forms may be included in the evaluation documentation.

Directions: First identify the area(s) of concern for the student. Behavior around each identified area is where you will focus your observation. During the observation place a check mark next to the behaviors that are observed within each domain that correlates with the noted areas of concern. Note, however, these checklists are not exhaustive. In the notes section, write any additional observed behavior, including strengths, which may be relevant to the student's evaluation.
