

**Fall 2008 Student Support Conference
October 6, 2008**

Strategic Action Planning Tool: 2008-09 School Year

Directions:

Using the strategic action planning tool as a guide, begin to develop concrete goals and action plans related to collaboration across funding streams and education initiatives. This document includes space for planning specific to the regional level and the district level. You are encouraged to continue this process when you return to your region/district and to also partner with programs and initiatives that were not represented at the conference today.

Guiding Questions:

- How can staff from your grants, and partners (if applicable), better work with others in your district/community regarding: student recruitment, directing students to the most appropriate local resource(s), sharing information related to program design and assessment, opportunities for professional development, successful strategies for all or specific students, etc?
- What specific actions/activities can you implement this school year to assess the effectiveness of communication among different local stakeholders about your student support grant programs/services – both about the services your grants offers and about other services to which you may direct the students you serve?

<u>Legend</u>	Implementation Progress:	Priority Level:
	○ At baseline	— Low priority
	◐ Started implementation of strategic action	▬ Medium priority
	◑ Significant progress towards target	■ High priority
	● Target accomplished
