Attachment #1: Fall River Progress Report								
Γ	Massachusetts Department of Elementary and Secondary Education							
	Center for School ar	nd District Accountability						
	Progress Report							
District: Fall River Public Schools ESE Monitor: Dr. Joan Connolly								
Review Period:	July - December 2010	Date of Report:	March 11, 2011					

Summary of Overall Progress to Date:

Progress in Implementing the Recovery Plan

The Fall River Public Schools (FRPS) Recovery Plan, as directed by the Commissioner includes four sections that reflect the areas of concern identified in the Evaluation Report prepared by the Office of School and District Accountability: Leadership and Governance, Teaching and Learning, Human Resource Management and Financial Management. The Recovery Plan was implemented in September 2009, and the first quarterly report provided a summary of the district's progress in each area through December 2009. This progress report provides an analysis of the district's progress one year after the first progress report-- through December 2010.

Leadership and Governance

From the end of the December 2009 reporting period to this reporting period through December 2010, the plan for strengthening Leadership and Governance has included strategies for developing a policy manual; improving School Committee meetings; establishing effective working relationships between the School Committee and superintendent; developing a handbook with clear role distinctions between the governing body and superintendent; developing and implementing a School Committee self-monitoring process; and, working in cooperation with ESE to improve the FRPS. A description of the progress for each of the seven strategies follows.

Fall River School Committee members have continued to work with the Massachusetts Association of School Committees, Bruce Assad, Esq., and Dr. Thomas Kelly on the development of the District Policy Manual. The Policy Manual has been completed and was approved by the School Committee on December 13, 2010. The Policy Manual is scheduled to be presented to district administrators in January 2011. Now that the Policy Manual is in place it will be incumbent upon both elected officials and school department staff to follow these policies in carrying out the business of the FRPS. The fidelity in using the Policy Manual, evaluating its effectiveness, and updating it as necessary—to result in the implementation consistent practices that support school and student success—will demonstrate whether this work has led to embedded and sustained improvements to leadership and governance. (Strategy 1)

The School Committee and the Superintendent have continued to work to improve the format of School Committee meetings. This work includes guidelines for subcommittee work, citizen input, a 6 month calendar for agenda items and an action agenda that includes Superintendent's recommendations and "vote to approve" action items. With these changes are in place, reliable execution is expected to improve the ways in which the School Committee interacts with each other, the superintendent, and district stakeholders in the service of conducting productive public meetings. (Strategy 2)

The School Committee and Superintendent have established practices to build a cohesive working relationship that supports informed governance and effective educational leadership. To prepare the School Committee for upcoming matters for discussion and decision-making, members receive back up materials for

agenda items seven days in advance of School Committee meetings. To keep members informed, the Superintendent continues to meet quarterly with individual School Committee members to discuss improvements to the school system, and has implemented a system of bi-weekly written communications from the Superintendent to the School Committee on December 17, 2010. By having and relying on reliable information channels to receive current information on programs, practices, the schools, challenges, and items on the next meeting agenda, the governance body is better poised to sustain a focus on decision-making and continuing to build a strong working relationship with the superintendency.(Strategy 3)

The handbook to clearly define roles and responsibilities and provide measureable indicators of success for the School Committee and Superintendent has not been developed. Some of the substance of the handbook necessitated the approval of the Policy Manual first. Now that the Policy Manual is in place, the School Committee, under the guidance of Dr. Thomas Kelly, needs to move forward to complete this action step. (Strategy 4)

The School Committee has implemented a revised evaluation procedure to evaluate the Superintendent which included agreed upon processes, tools and procedures. The School Committee completed its first evaluation of the Superintendent using the revised procedure in November 2010. It also has developed an annual timeline which must be followed to ensure timely evaluations of the Superintendent every year. According to this timeline the evaluation will be completed in June 2011. Adhering to this timeline going forward will demonstrate the School Committee's commitment to embedding its policies and procedures to solidify its new ways to act upon its key role in holding the superintendent accountable for the continuous improvement of the school system. (Strategy 5)

The School Committee has worked with Dr. Thomas Kelly and Bruce Assad, Esq. on the development of a self evaluation tool for the purpose of monitoring its adherence to School Committee rules and expectations. The School Committee approved a self-evaluation tool on December 13, 2010, and decided to submit completed, anonymous forms to Attorney Assad by January 4, 2011 with the goal of reporting the composite results at the January 10, 2011 School Committee meeting. Follow through on these actions under the leadership of the Chairman of the School Committee will demonstrate initial commitment to this practice. The reliable administration of the decided upon self evaluation tool, and the self-monitoring after each meeting, should result in self-reflective and continuously improving School Committee discourse and actions. (Strategy 6)

The School Committee and district leadership continue cooperating with DESE in support of the Recovery Plan. Recovery Plan Action Steps are included on monthly School Committee agendas for discussion and action. The Superintendent will report on 12 month benchmarks at the January 2011 School Committee meeting in addition to the established monthly reporting. The district has used ongoing support and assistance from ESE and negotiated adjustments and changes to the Recovery Plan to respond to identified needs and changed circumstances. (Strategy 7/Condition 9)

In summary, elected officials and leadership of the Fall River Public Schools have made progress in establishing systems to guide, improve and monitor the effectiveness of their work. The next critical challenge for the school district is using these systems with fidelity to embed the new ways of conducting business in the FRPS. For example, the Policy Manual must reliably guide practice so that actions should follow existing policies, and new policy needs should be proactively identified. If there is need for a policy on a topic, the School Committee must make it its business to develop a policy. Further, some critical work needs to be executed. Developing the handbook that articulates the roles and responsibilities of the School Committee and the Superintendent must be a School Committee priority and completed in a timely manner. The School Committee Self-Evaluation tools and processes must be refined according to the will of the majority of the School Committee and immediately put into practice.

Teaching and Learning

From the end of the December 2009 reporting period to this reporting period through December 2010, the plan for strengthening Teaching and Learning has

included strategies for developing aligned strategic and improvement plans; improving instruction for English language learners; improving instruction to students with disabilities; improving student learning through more effective use of assessment data; program evaluation; improving the curriculum and its delivery; and, coordinating strategic efforts A description of the progress for each of the seven strategies follows.

A planning group has been working together to develop a strategic plan. This group has met a total of eight times since January of 2010, and the work of developing a Strategic Plan is ongoing. The planning group includes community partners, parents, teachers, union representatives, administrators and school committee members. Three themes have emerged from the "scenario planning", social and emotional wellness, community integration and technological impact. The writing of the plan has begun. (Strategy 1, Action Steps 1.1 and 1.3)

The 2010-2013 FRPS District Improvement Plan was approved at the November 8, 2010 School Committee meeting. The DIP was built from the strategies of the Teaching and Learning section of the Recovery Plan and was influenced by the District Vision of the Strategic Plan. After the completion of the DIP school leadership teams participated in a two hour workshop to understand the new plan. Schools were then directed to amend their existing SIPs to better align with the DIP. A mechanism has been developed to assure that SIPS and the DIP are aligned. There is alignment with student performance outcomes. There is also alignment between the DIP and the Strategies and Acton Steps of the SIPS. The Office of Instruction designed a rubric to assess the degree of alignment in designated areas. It was noted that prior to this rubric and associated feedback, SIPS demonstrated weaknesses in addressing action steps to support English Language Learners and Special Education students. (Strategy 1, Action Steps 1.2 and 1.4)

A new protocol for monitoring schools was introduced, the School Review Visit. Schools have been placed in one of three tiers of support: high, moderate or low. District administrators are expected to make regular visits to their assigned schools based on need in order to provide monitoring, and/or assistance and to share successful strategies from other schools. Strategy 1, Action Step and 1.5)

Practices to support English language learners (ELLs) have been improved. Progress is being made in strengthening the ELL expertise of teachers and staff with the larger goal of improving the achievement of English Language Learners. Every school has at least one staff person trained as Qualified MELA-O Assessors. (Strategy 2, Action Step 2.1) Additionally, schools are now able to place LEP students in classes with qualified (category trained) staff because a database of category trained staff has been created in X2 Aspen and updated after each training. School administrators can query their category trained staff. The five schools that have the largest number of limited English proficient students are piloting the use of The Sheltered Content Classroom Observation Tool to improve student comprehension of classroom subjects while they are still learning the English language. These schools also have priority status for training staff. (Strategy 2, Action Step 2.2)

New procedures for student identification of students in various stages of learning English have been implemented K-12. A system for coding students in X2Aspen has been established and Student Information Management System staff have been trained to use the system correctly. A system for reclassifying and monitoring students has been implemented. Each school has an administrator overseeing the exiting and monitoring system at the school level. (Strategy 2, Action Step 2.3 and 2.4)

ELL Parent involvement programs have been redesigned. A Spanish speaking Community Worker has been hired, and a Portuguese speaking Community Worker has been reassigned to the Student Assignment Center. Surveys were randomly sent to families with children who entered the ELL Program, but only one third were returned. The FRPS needs to continue to be aggressive in their efforts to receive feedback from parents. As a result of feedback they did receive, however, the ELL Parent Brochure is being revised and updated. (Strategy 2, Action Step 2.5)

In response to the Corrective Action Plan, the district worked to address civil rights and ELL compliance issues. FRPS made efforts to form a Parent Advisory

Group. Feedback from families indicated that there was a need for school-based structures for communication and meetings versus district-based structures. Many different kinds of efforts are being made at the school level to communicate more effectively with parents of ELL students. Translations are available at parent conference nights, more notices are being sent home in Spanish and Portuguese, more aggressive efforts are being made to reach out to parents of ELL to attend school events. Math nights have been redesigned to be more sensitive to ELL parents. ELL Progress reports have been piloted at two elementary schools and plans are being made to expand this effort. (Strategy 2, Action Step 2.6) The role of ELL liaisons has been revised and the district has expanded its ELL program to all schools at the elementary level. There is a lot of training happening throughout the system that is designed to fit the needs of the school (s). (Strategy 2, Action Step 2.8)

The system continues to face some challenges in supporting and monitoring the implementation of Sheltered English Immersion and effective ELL instruction. During this school year a new tiered system has been established. While it appears comprehensive, it also seems somewhat complicated. Also, with a goal of increasing the number of ESL certified staff in program schools by 50%, the district has continued to lack success in recruiting applicants for positions teaching English as a Second Language. (Strategy 2, Action Step 2.7 and 2.9)

The district is also struggling with the development of its ELL K-12 curriculum that will align with Massachusetts' English Language Performance Benchmark Objectives. The staff involved continues to revise the curriculum documents based on feedback received. At this point ESL K-8 curriculum maps are in draft form; for grades 9-12, maps are in place for more revision through January. There is a plan to hire a consultant to work with staff on this project. (Strategy 2, Action Step 2.10)

With regard to the overall strategy to improve ELL instruction, the district acknowledges that the plan for rolling out processes and procedures needs to be refined, given the variances in school and principal needs in the district. While the FRPS is working hard to put systems and processes in place to best serve their population of English Language Learners, there is much work to be done before reliably effective systems to support teaching and learning in the classroom are in place. This area falls within the responsibility of the Office of Instruction, which is a suitable vehicle for building ownership for the learning of all children, including those learning English, across the entire school system. The district states that they have moved from a reactive to a proactive mode in developing content staff's capacity to teach ELL students. Leaders also acknowledge that the professional development plan is more in-depth and <u>complex</u> than their previous plan. In order to implement this and other complex approaches effectively, all stakeholders in the FRPS need to develop real ownership and commitment to addressing challenges facing all learners. The district must rapidly take on the difficult and challenging work to expand its capacity and commitment to secure the resources and support required by students learning English to achieve at high levels. (Strategy 2)

Continued progress has been made in strengthening the expertise of teachers with the goal of improving achievement of students with disabilities. Training in how to work with children with autism continues; seven Fall River teachers are becoming Board-Certified Behavior Analysts. Professional development is ongoing to prepare for the restructuring of the elementary inclusion model so that students with disabilities are included as much as possible in regular education classes. In response to a needs assessment about special education classes at the middle school level, an alternative middle school was opened in September 2010. A Special Education Procedural Manual has been developed which includes updated systems and forms. All required parental and student notices are now available in the language of the home. (Strategy 3, Action Steps 3.1, 3.2, 3.3, and 3.4)

Technical requirements necessitated by the Corrective Action Plan for special education have been all met, and the Special Education Department has also put in place systems and procedures that are part of the Recovery Plan. The district's progress report for Action Step 3.7 states that "All Fall River school personnel are clear about their roles and responsibilities and about the procedures and processes that need to be followed." This is important and necessary. What remains unclear is the degree to which all Fall River personnel feel a shared responsibility in educating all children with disabilities. Without shared responsibility, the achievement gap between children in "regular education" and those in" special education" is unlikely to be narrowed. Using the new tiered method of service to

schools, the district is well poised to take steps to ensure that all staff are clear about their responsibilities for these children, and that the expected practices are implemented, monitored, improved after high-quality feedback, and continue demonstrating shared ownership of the education of all children. (Strategy 3, Action Steps 3.5, 3.6, 3.7, 3.8)

The use of student data to target instruction is developing. District-wide common formative assessments are in place grades 2-12. Schools have access to a variety of reports in a format that allows them to use the results of the formative tests to change and/or improve instruction. Training for Test Wiz has been in place since 2003. The use of Test Wiz allows access to immediate data in order to monitor district and school progress. There is ongoing professional development for teachers and administrators on how to analyze data and use that analysis to improve instruction. The major focus for all schools this year is TERC's Using Data with training starting in the summer of 2010. (Strategy 4, Action Steps 4.1, 4.2, 4.3)

Program Evaluation is underway to eventually allow FRPS to understand the impact of initiatives. The FRPS determined that the district did not have the capacity to do rigorous program evaluations. This determination led to the hiring of the new Director. This process appears to hold great promise for the district. The new Director of Program Evaluation was hired in October 2010. During the short time that she has been in this position she has identified a program evaluation model that will guide all district program evaluations. The goals of these evaluations will be ongoing program improvement and measuring program effectiveness, to determine what is required to sustain a program, and to identify areas for professional development. In December district program evaluations were developed. A positive indicator of this new process of program evaluation is that the evaluations are directly connected to Teaching and Learning strategies and action steps included in the DIP. (Strategy 5, Action Steps 5.1, 5.2, 5.3) One evaluation plan has been created using the new model. This evaluation will study the district's instructional coaching model. The evaluation will assess the value of instructional coaches and guidance counselors in working with the needs of ELL and Special Education students. (Strategy 5, Action Step 5.4) Program evaluation will help to support the main function of the Instructional Leadership Team, to monitor the implementation of the DIP. Five other program evaluation models have been conducted in the past year. (Strategy 5, Action Step 5.5)

Curriculum improvements are notable. The district is revising their curriculum using a system of standards mapping. There are three stages of this work, mapping and benchmarking, developing common units of study, reviewing and revising. Stage 1 of the Curriculum Renewal Cycle has been completed. The ELA PK-12 has been aligned to the revised ELA Massachusetts Curriculum Framework and Common Core. Mathematics K-8 Curriculum Maps have been disseminated and K-5 Science Curriculum Maps are available. The Middle School Science Curriculum has been in a two year revision cycle and is being implemented in all middle schools. This is the revision year for Social Science. Teachers have three ways in which to contribute to the work of curriculum alignment; membership on a curriculum design team, give feedback on the mapping through a Feedback Template and will next be able to give feedback on implementation of the curriculum maps. (Strategy 6, Action Steps 6.1, 6.2, 6.3, 6.4, 6.5) The implementation of the ELA curriculum maps was supported by professional development provided to principals, who in turn were expected to provide professional development to their staff. (Strategy 6, Action Step 6.6) The curriculum renewal process and School Review Visits are in place to ensure regular improvement and delivery of the aligned curriculum. (Strategy 6, Action Step 6.7)

Work is underway to develop a system of more effective method of communication between the FRPS and families, staff and community. During the summer of 2010 a communications consultant was hired to conduct interviews with stakeholders, provide communications training for principals and members of the senior leadership team, and develop a draft Communications Policy. This policy is scheduled for a presentation to the School Committee in January. (Strategy 7, Action Step 7.1)

The alignment of resources to support teaching and learning are being considered in the process. District improvement priorities are being communicated to the district budgeting process via a newly developed Budget Template. School Improvement Goals and accompanying narrative are included in the template and

they align with changes and or additions to a school's requested budget. (Strategy 7, Action Step 7.2) Groups of stakeholders are in place who will advocate for the resources necessary to support the goals of the FRPS. (Strategy 7, Action Step 7.3)

Overall, in the area of Teaching and Learning, significant progress has been made in the area of curriculum alignment and processes for the implementation of that curriculum. Holding all parties accountable for changes to practice, tracking progress through interim assessments and adjusting instruction based on results will be the next set of challenges to be met. Student achievement data will be an important indicator about the added value of the new curriculum and instructional practice in Fall River classrooms. Data will also be indicative of how closely building leaders and teachers are adhering to the curriculum documents and maps that were developed through the collaborative process that included a significant investment of the time of district leaders, teachers and some outside consultants.

One of the critical needs remaining, as the different segments of the school system develop their systems of best practice, is greater integration of systems that support differentiated needs of children of Fall River. Children who speak English as a second language need to be assured of access to all programs in all schools. The faculty and leadership in Fall River schools must go to great lengths to assure their students and their families that they all will have the opportunity to participate in high quality learning environments and will receive the supports that they will need to succeed. Similarly, Special Education services must be viewed by faculty and leadership as valuable services to improve teaching and learning, not simply compliance activities. These programs and services should support student learning to narrow the achievement gap between "regular" education students and "special" education students.

Human Resource Management

From the end of the December 2009 reporting period to this reporting period through December 2010, the plan for strengthening Human Resource Management has included strategies for hiring a Human Resources director; actively addressing school leader needs; developing evaluation instruments and procedures for administrator and support staff evaluations; implementing a new teacher evaluation instrument; developing an employee assistance program; and reaching a collective bargaining agreement with FREA. A description of the progress for each of the six strategies follows.

A Human Resource Director has been hired and has received training and mentoring from the outgoing Recovery Director of Human Resources. Training has been provided on-site and by phone. The Director has developed an entry Plan with time-bound goals and a separate guiding document that details her responsibilities for accomplishing the Human Resources strategies in the Recovery Plan. (Strategy 1)

Increased support has been provided to building administrators from Central Office staff. Periodic meetings for building administrators are scheduled to a channel to communicate building needs and feedback on what is working and what is not. Targeted professional development has been provided to principals to assist them in understanding and meeting the goals of the FRPS and of the Recovery Plan. Principals have developed a set of Smart Goals designed to further assist them with aligning their work with district goals. Monthly leadership seminars are being held to specifically address goals in teaching and learning, human resources and financial management. A district Leadership Team has been developed to increase communication across schools and departments in addition to being another way to provide support to principals. (Strategy 2)

Progress is being made towards the goal of having current evaluation systems in place and <u>utilized</u> for all staff in the FRPS. A tool has been developed that will be used during this school year to evaluate central office staff. An evaluation document has been approved to evaluate Principals during this school year as well. The teacher evaluation tool is currently being piloted with full implementation to begin in June 2011. Negotiations have been completed for the district's Level 4 schools; this included full implementation of the new teacher evaluation tool with no pilot year. Paraprofessional job descriptions, evaluation tools, and evaluation procedures have been negotiated; ratification was scheduled for January 2011. Revisions to evaluation tools and processes for custodians,

maintenance and nurses have been planned. The last area for revision to evaluation tools and processes is the evaluation instrument for Fall River Administrative Association members, including Vice Principals, Department Heads, Coordinators, Counselors and Psychologists. The district has requested to begin negotiations. (Strategy 3 and 4)

An Employee Assistance Plan has been developed, funded, approved by the School Committee, and is currently in place.(Strategy 5)

A successor collective bargaining agreement is not in place. The one year agreement that was in place has expired. Currently there is no contract between the Fall River Educators Association and the Fall River School Committee. Negotiations are ongoing. Condition #7 from the Commissioner of Elementary and Secondary Education has not been met. (Strategy 6/Condition 7)

In summary, some human resource systems have been developed and put in place that will support and guide the system in developing and retaining a high quality staff. At this point, supervisors must assure that those supervision systems and evaluation instruments are used in a rigorous manner consistent with the agreed-upon protocols of administration. Systems designed to improve communication between central office and building level administrators have been developed and are being utilized in a manner that holds great promise. All those charged with serving the children of the FRPS must commit to using those systems to assure that all communication is clear and **focused on necessary improvements that lead to higher student achievement**.

To that end, the Director of Human Resources must work closely with the Superintendent to assure that all staff are evaluated using the new processes and tools in place. Staff performing below expectations should be subject to the proper disciplinary steps outlined in his/her supervision and evaluation documents. Also, the Director of Human Resources must work closely with central office staff and building leaders to develop a recruitment and hiring system that ensures high quality staff with the qualifications, licensure, demonstrated potential, and extraordinary commitment to ensure the quality of education that all Fall River students deserve.

To move forward in the next of the Recovery Plan—Financial Management—the Director of Human Resources must work aggressively with the Superintendent of Schools and the Fall River School Committee to recruit a qualified Chief Financial Officer (CFO).

Financial Management

From the end of the December 2009 reporting period to this reporting period through December 2010, the plan for strengthening Financial Management has included strategies for hiring a CFO; conducting a review of financial procedures and policies; completing an expanded financial audit; identifying and maximizing cost efficiency and effectiveness; creating a collaborative budget development process; creating a Capital Improvement Plan; using ESE resources effectively; and supporting principals in making effective site-based budget decisions. A description of the progress for each of the eight strategies follows.

Preliminary steps for preparing to hire a permanent CFO for the FRPS have been completed: a job description was developed, job announcements were posted, and ongoing outreach and recruitment efforts occurred. Despite these efforts, a permanent CFO has not been appointed. (Strategy 1)

In response to the Massachusetts Association of School Business Officials (MASBO) report, essential elements have been put in place such as: Cash Handling Procedures, Financial Procedures and Procurement Manuals, and approved Financial Policies. The FRPS has entered into a management contract with a food service company to operate and manage food services. The position of Financial Manager has been created and filled. He is able to oversee functions related to Payroll, Bookkeeping and Food Services. Financial policies have been developed with the guidance of Massachusetts Association of School Committees as part of the Policy Manual work. (Strategy 2, Action Steps 2.1 and 2.3)

To streamline the financial department's policies and procedures, an Action Plan has been developed and implemented. The Financial Manager oversees day to day operations and manages the business department. The Finance Manager and the Assistant Business Manager work together; the Superintendent reports that this has improved the operational communication between the administration and the Business Office. (Strategy 2, Action Step 2.4)

The FRPS plans to combine the findings from the MASBO financial review and annual audit to extend the annual audit to a full financial audit. Recently the City Auditor completed this audit through the 2008 fiscal year and is now working on 2009. Many problematic findings and issues with financial management were cited in these audits. Because there had not been any interventions or corrections, many of the findings were compounded in the audit of the following year. The Superintendent reports that corrective actions taken in 2009 and 2010 will address issues that have been identified in previous years. (Strategy 3)

The findings of the audits are yet another piece of evidence about how critical it is that the FRPS continue to aggressively search for a permanent CFO who will have the training, qualifications and background experience to oversee the enormous task of establishing a sound financial operating system to ensure that district resources are managed effectively in support the student needs.

Another piece of evidence that hiring a CFO is critical is that the district has not consistently managed grants effectively. In a letter to Superintendent Mayo-Brown dated December 21, 2010, Associate Commissioner Lynda Foisy states, "While we understand the demands on the district at this time, given that a Recovery Plan, Level 4 plans and general improvement initiatives require time and attention from leadership in the district, one area that continues to require an improvement focus is budget planning/effective utilization of grant funds". This letter was in response to a request from the district to approve funds for a grant that was submitted late.

A third piece of evidence that a CFO is a critical need is the districts' inability to identify ways to maximize cost effectiveness and efficiencies. The original strategy to meet this goal was to "identify and act of areas where resources and services may be consolidated to maximize efficiencies and cost effectiveness through a collaborative process." The superintendent has requested that this strategy be reconsidered. The basis of the request is two-fold, as stated in her official request, "Some of the conditions and issues that produced this step have already been addressed by other actions and parts of the Recovery Plan, and we are unable to predict a timeline or commit the city's availability to proceed within an area that in no longer identified as an initiative by the current administration." ESE agrees to modify the strategy as follows: The permanent CFO will review the Action Steps included under Strategy 4, be appraised of the issues that led to this Strategy by the Superintendent and the Chairman of the Fall River School Committee, and provide recommendations for opportunities for cost-savings that may or may not include collaboration with the municipality. (Strategy 4)

Even without a CFO, the budget development process is moving forward. The FRSC approved the indirect cost agreement in January 2010. The agreement was sent to the City at that time for city approval. The indirect cost agreement was signed by the Mayor on November 2010. A budget timeline is included in a policy included in the Fall River Policy Manual that was approved in December 2010. There are three separate policies that outline the process. It is expected that this timeline will allow for budget development within a time frame that allows for careful planning. (Strategy 5)

The work to ensure buildings are assessed and maintained is underway. A Capital Improvement Planning Team was organized in the fall; the first meeting was held in October. A consultant (Roger Young Associates) was brought on to help with the organization of the project. A Preventative Maintenance Manual is being developed. The plan is to have twelve buildings assessed by the end of February 2011. (Strategy 6)

ESE assistance has been utilized throughout the recovery process. A Memorandum of Understanding between the FRPS and ESE has been established that outlines technical assistance to be provided to the district. The Superintendent attends all meetings of the Urban Superintendent Network. The FRPS has

engaged in applying for all appropriate competitive and entitlement grants. However, as noted above, timely grant submission and utilization is an issue. (Strategy 7)

Steps have been taken to support site-based budget decisions. Munis software training has been provided to all school cost centers (principals and directors), and principals are provided with budgetary updates and feedback on the budget.(Strategy 8)

In summary, MASBO and other internal auditors have identified needed remediations to business practices in the Fall River Public Schools. The district has taken initial steps to put systems and processes in place to improve practices, such as placing new hires on the payroll in a timely manner, managing grants so that allocation of funds can occur on schedule, and making on time payments to vendors. These steps should serve as a sound foundation for a CFO to build upon when creating a strong business office to serve the Fall River Public School district.

Progress in Addressing the Commissioner's Conditions

The district's progress in meeting each of nine conditions established by the Commissioner of Elementary and Secondary Education for the implementation of the Recovery Plan, will be summarized following each condition below:

- 1. Revised benchmarks throughout the Plan that are more specific and measureable, adjusted timelines, revised outcomes and more specificity about ESE technical assistance and funding. *This condition is being met.*
- 2. Steps to develop the capacity to correct areas of non-compliance noted in the Comprehensive Program Review and to ensure timely implementation of the district's Corrective Action Plan. *The condition has <u>not</u> yet been met with respect to requirements for English language learners. This condition has been met with respect to students with disabilities, Civil Rights and Career and Vocational-Technical Education.*
- 3. The addressing of findings and recommendations in the Plan from the financial systems review conducted by MASBO. *This condition has <u>not</u> been met; the district lacked a permanent Chief Financial Officer to complete this work.*
- 4. The hiring of an interim "Recovery Human Resources Director" and an interim "Recovery Chief Financial Officer," the Recovery HR Director and the Recovery Chief Financial Officer will create structures in their departments to address issues identified in the reviews and lead the recruitment and selection process for the permanent candidates, ESE will participate in the recruitment and selection of both candidates, the final candidate for each position must be approved by the Commissioner before hiring. *This condition has not been met with respect to the hiring of the permanent Chief Financial Officer. This condition has been met with respect to the Human Resources Director.*
- 5. An Addendum written by ESE staff from the Center for Targeted Assistance identifying the scope of ESE assistance available to support the Plan. *This condition has been met.*
- 6. The incorporation of technical assistance from ESE to further implement the National Institute for School Leadership model by supporting district leadership responsible for overseeing strategies to improve teaching and learning. *This condition was met.*
- 7. The School Committee and Fall River Educators Association must reach a fiscally responsible agreement on a successor collective bargaining agreement to extend for at least one year which will enable the district to achieve short and long term cost savings and/or cost avoidance so that the district can have resources needed to implement the Recovery Plan. *This condition has <u>not</u> been met; there is no district-wide collective bargaining agreement for teachers in the 2010-2011 school year*.
- 8. The final approved School Budget must be aligned with the goals of the Recovery Plan. *This condition is being met.*
- 9. The School Committee and district leadership must demonstrate continued cooperation with the Department and support for the Recovery Plan. *This condition is being met.*

Impact on Student Achievement

From the 2008-2009 baseline year to the 2009-2010 year when the Fall River Recovery Plan was first implemented, the percentage of students proficient in ELA remained unchanged at 45% proficient and the student growth percentile (SGP) also remained constant at 42 SGP. Over the same period, proficiency in math increased from 32% proficient in 2009 to 37% proficient in 2010; the SGP also increased from 44 to 52. If the Recovery Plan is well implemented, particularly with respect to focused improvements to curriculum, instruction, supervision, monitoring and professional development, there will likely be an increase in student achievement on the 2011 MCAS test. Performance and improvement for limited English proficient students, and for students with disabilities, is still lagging. For the district to make progress in narrowing achievement gaps, Recovery Plan activities need to be supported by a shared ownership by all staff in the effort to meet the differentiated learning needs of all students in the schools.

Assistance Provided by ESE

The Department of Elementary and Secondary Education has provided technical assistance and funding articulated in an addendum to the Recovery Plan. Technical assistance has included ongoing support from: an ESE liaison, a School Committee consultant, and a district leadership and human resources consultant.

Next steps

This summative report will be presented to the Commissioner and the Board of Elementary and Secondary Education.

• With respect to the district's progress in Implementing the Recovery Plan: *The district is beginning to build stronger district systems; more work is needed for district systems to consistently and effectively serve the needs of schools, staff, and students, and to sustain the improvements over time.*

- Progress in Addressing the Commissioner's Conditions: Five of the nine Commissioner's Conditions have been met.
- Impact on Student Achievement: 2011 MCAS data will provide further information about the impact of the Plan's implementation on student achievement.
- Assistance Provided by ESE: The district's progress has been assisted by significant ESE assistance and funding; evidence does not yet suggest the district is ready to sustain improvements without continued state intervention and support.
- Next steps: Recommendations for the district and ESE in the subsequent school year will be made by the Commissioner.

Background

In January 2009 Fall River Mayor Robert Correia and Commissioner of Elementary and Secondary Education Mitchell D. Chester agreed to have ESE send a review team from the Office of District and School Accountability to the Fall River Public Schools to evaluate leadership and resource management in the district. The team reviewed student achievement data and documents provided by the district prior to conducting interviews and classroom observations in Fall River from January 12-15 and on January 21, 2009. Although the team found that the district has made some progress in such areas as curriculum development and alignment, professional development, and student assessment, the review revealed six significant weaknesses in the Fall River Public Schools. In the area of leadership, the team found that inadequate delineation of roles and responsibilities between the superintendent and school committee was deterring effective district leadership and undermining community support; that principals receive insufficient support from the central office; that the failure of the district to evaluate its programs and services left it unable to improve them; and that the district's human resources department lacked professional leadership as well as effective systems, structures, and procedures. In the area of resource management, it found that the district lacked adequate financial systems and procedures; and that Fall River would not meet its Net School Spending requirement for fiscal year 2009, its school appropriation having declined between fiscal year 2008 and fiscal year 2009. Other weaknesses in the district included deficiencies in the evaluation of staff, from the superintendent on down; lack of strategic

alignment among school committee actions, the central office's improvement plan, and schools' improvement plans; lack of effective leadership and adequate support for programs for English language learners and students with disabilities; lack of adequate and affordable transportation, especially for high school students; and the part-time status of the school department's chief financial officer. These findings led to recommendations in four areas: school committee governance; strategic implementation of improvements to teaching and learning; human resource management; and financial management. Among them were recommendations that the school committee build its capacity to function as a responsible governance team; that the district develop a District Improvement Plan accepted by all members of the school community; that leadership identify, advocate for, and protect resources needed for improvement; that the district provide principals with the resources they need; that the district implement sound evaluation procedures; and that an external audit of the district's finances be conducted as soon as possible. The team recommended that ESE, while providing guidance and technical assistance, use its authority to monitor the district to ensure that it makes progress in the four areas covered by the recommendations.

The report was accompanied by a letter from Commissioner Mitchell Chester to Mayor Robert Correia. In the letter the Commissioner states that the "report paints a sobering picture of a school district with persistent, serious and systemic problems. Despite this picture I am heartened by the initiative that you took to request the review". The Commissioner directed that the Fall River Public Schools develop a Recovery Plan with direction from the Departments' Office of Accountability that addressed the deficiencies identified in the Report, identify benchmarks of progress for which the district would be held accountable and specify the assistance that would be provided from the Department's Office of Targeted Assistance.

The Fall River Recovery Plan was submitted on July 15, 2009. The Commissioner wrote a response to Mayor Correia on August 14, 2009. In this response he said that since he had reviewed the Evaluation Report prepared by the Office of School and District Accountability and the financial management audit conducted by the Massachusetts Association of School Business Officials, he now understood that there were more areas of the Fall River Public Schools in urgent need of correction. Commissioner Chester then identified nine additional conditions that needed to be added to the Recovery Plan.

Additionally, The Commissioner requested that a revised Recovery Plan be submitted by September 30, 2009. The Plan was revised, approved and submitted in a timely manner and is in place, guiding and driving the work of the recovery of the Fall River Public Schools.

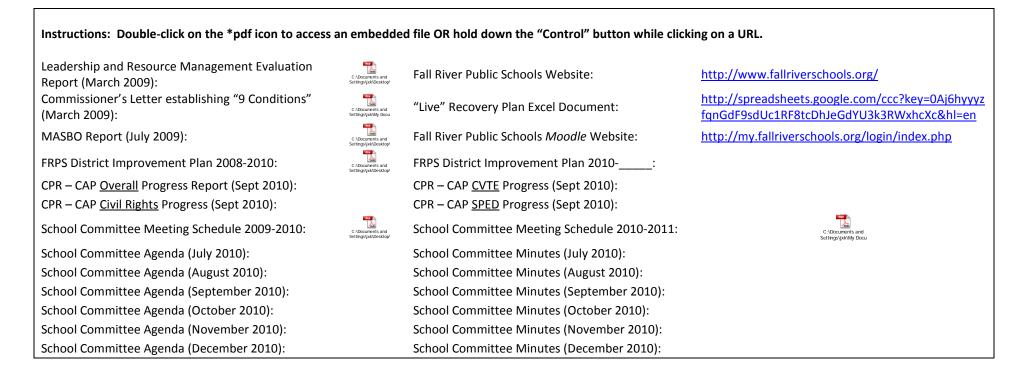

Guidance for utilizing and interpreting the detailed District Progress Report

- Strategies and Action Steps are *taken directly* from the Recovery Plan. Only Action Steps that correspond with the review period are included, and *not all areas listed will necessarily be assessed*. Assessment of Action Steps is based on **priorities** within the reporting cycle.
- Benchmarks/Goals and Artifacts are *summarized* from the language of the Recovery Plan.
- **Evidence/Comments** are included "as needed" and are based on information gained from *evaluation procedures* (e.g., review of artifacts and data, interviews with stakeholders, observations, etc.).
- The **Assessment** is made based on the efficacy of the District to fulfill each Benchmark/Goal for an Action Step *independently* and *in concert with* other Action Steps comprising a Strategy. The following is the rating scale used. **N/A=Not Assessed**: The monitor did not review the benchmark for the current report period. **0=Undeveloped**: the district did not meet the benchmark in a timely, complete, or sufficient manner. **1=Under-developed**: The district made initial steps, but did not take all actions planned to complete this benchmark goal. **2=Developing**: The district established structures and a foundation for continuing the work in this area. **3=Practices & Resources in Place**: the district not only established structures and a foundation, technically meeting the benchmark, but also established new practices and/or new resources to support implementation. **4=Fully Embedded & Sustainable**: the district established new practices and/or new resources to support implementation, and has fully completed this step, by ensuring that the new work is fully embedded in the district and sustainable by the district over time. The district can be responsive to future needs in this area through established systems for ongoing district monitoring and improvement.
