STANDARDS-BASED COMMENTARY

The student writing sample that follows includes standards-based commentary. The commentary found in this column describes how the writing meets the standards in the *Massachusetts Curriculum Framework for English Language Arts and Literacy (2017)* and other content frameworks when applicable.

Understanding the Standards-Based Commentary

1. Grade-specific standards addressed are:

- Listed in the column to the right of the student work by strand, grade, and number (or number and letter, where applicable)
- Marked by a colored block with a letter code, also in the column to the right of the student work

EXAMPLE: **A**

2. Colored blocks beneath each standard in the right column:

- Are of the same color and letter code as the block that marks the standard being addressed
- Mark standards-based commentary related to the standard being addressed
- Appear in alphabetical order

EXAMPLE: **A1**

3. Corresponding colored arrow blocks within the text:

- Set off sections of student work to which commentary applies
- Do not necessarily appear in alphabetical order—but where evidence of a particular standard exists

EXAMPLE: (begin) **A1** section **A1** (end)

Instructional Practices:

The teacher used the following practices:

- Making provisions for a daily routine of bird identification
- Teaching the concept of cause and effect and encouraging thinking, reasoning, and sequencing, with an emphasis on organization, while supporting and preserving the individual voice
- Expecting and encouraging students to practice stating opinions both orally and in writing
- Providing opportunities for every student to become an “expert” on a bird, using digital resources, books, and observations
- Setting an environment for students to share what they learn

Assignment Description:

Students were immersed in an interdisciplinary project that began with identifying birds. Each child chose a particular bird to learn about through research and created a model of the bird. Students used what they learned about their chosen bird to give an oral performance. This could have been a student-written poem, haiku, or informational piece. Students produced four types of writing (poetry, narrative, opinion, and informational) over the course of six months as each was becoming an expert on a bird.

Intended Audience:
