Steps for Leading EOY (May/June) Data Meetings

Purpose of Data Meetings

- **Purpose:** Dedicated time to evaluate effectiveness of instruction over the course of the school year and consider adjustments for the following school year, using systematic data analysis and common language.

- **Objectives:**
  - Determine a student’s response to instruction
  - Confirm/Update Instructional Focus
  - Make recommendations for intervention groups for next school year
  - Identify differentiated instructional plan
  - Assign a progress monitoring plan, if necessary, such as summer school

- **Who Attends:** coaches, principal, grade level teachers, any teachers responsible for intervention (SpEd, ELL, reading teachers, tutors etc.)

Before Data Meeting

1. Review **Data Meeting Preparation Checklist**
2. Consider how you will use resources such as Singleton’s Compass to manage bias, defensiveness or misconceptions that may arise during data meetings.

During Meeting

1. Frame data meetings with above objectives to proactively address potential biases.
2. Identify Note taker to complete **Data Meeting Action Steps** or school/district determined notes form.
3. Confirm attendees have copies of:
   - Student Benchmark and/or Progress Monitoring booklets, or electronic version.
   - **Student Progress Monitoring Graph** report, and/or any additional reports from other assessments used.
4. If reviewing data in an excel sheet or sortable report, sort data by predominant subtest measure. (e.g., K: NWF-CLS and 1+: ORF-WRC).

[FOR STUDENTS WHO WERE PROGRESS MONITORED]

5. Analyze progress monitoring graphs and determine student’s response to instruction (e.g., below growth, typical growth, ambitious growth).
6. Using the grade level decision tree, determine if the student’s Instructional Focus will change
7. Identify need for Fall group, as applicable.
8. Add brief additional notes as needed. These should include any information that would be helpful to bring to the attention of the student’s new teacher at the start of the year.

[PREVIOUSLY BENCHMARK STUDENTS]

9. Using the grade level decision tree, determine if the student’s Instructional Focus will change
10. Identify need for Fall group, as applicable.
11. Add brief additional notes as needed. These should include any information that would be helpful to bring to the attention of the student’s new teacher at the start of the year.

[NEW STUDENTS]
12. Using the grade level decision tree, determine Instructional Focus for any new students who do not yet have an instructional focus.
13. Identify need for Fall group, as applicable.
14. Add brief additional notes as needed. These should include any information that would be helpful to bring to the attention of the student’s new teacher at the start of the year.

[GROUPING]
15. If you are using an electronic document, filter students by Instructional Focus area, and then within that Instructional Focus area sort low to high by target subtest for that area (i.e., PSF, NWF-CLS, NWF-WRC, ORF-ACC or ORF-WRC etc).
16. As you make Fall groups for students requiring strategic or intensive support, ensure students with similar needs are grouped together (by instructional focus and within an instructional focus, by similar data sets). These will be recommendations for the following school year so that intervention groups can begin right away.
   • SPED and ELL students that must be assigned to SPED/ELL teacher during intervention block should be grouped first.
   • Most at-risk students should be assigned next, in smallest groups if possible and assigned to interventionists as feasible.
17. Identify the program and/or instructional materials that align to the Instructional Focus area.
18. Repeat steps 15-17 for each instructional focus.
19. Once all students are assigned, confirm groups and alignment between instructional focus, group/teacher and instruction.

[WRAP UP]
20. In your data system (e.g., DDS, mClass, iReady…) review reports, such as “Class Progress Graphs”.
21. Based on grade level growth, identify topics/discussion points for upcoming implementation and leadership meetings as you plan to support implementation for the following school year.
