

The diagram below shows four common tools.

Wrench

Pliers

Rubber mallet

Steel hammer

“Use the right tool for the right task” is an important safety rule in any situation.

- Describe a task for which the right tool to use is a wrench but not pliers.
Explain your answer.
- Describe a task for which the right tool to use is pliers but not a wrench.
Explain your answer.
- Describe a task for which a rubber mallet is better suited than a steel hammer.
Explain your reasoning.
